need in real publications for college students seeking advanced degrees real publishes test preps for many major graduate school admission examinations in a wide variety of disciplines including engineering law and medicine students at every level in every field with every ambition can find what they are looking for among real publications while most test preparation books present practice tests that bear little resemblance to the actual exams real series presents tests that accurately depict the official exams in both degree of difficulty and types of questions real practice tests are always based upon the most recently administered exams and include every type of question that can be expected on the actual exams real publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals instructors librarians parents and students our authors are as diverse as the fields represented in the books we publish they are well known in their respective disciplines and serve on the faculties of prestigious high schools colleges and universities throughout the united states and canada chapter 1 succeeding in ap statistics the objective of this book is to prepare you for the advanced placement examination in statistics by providing you with an accurate representation of the test toward that end we provide an extensive review and practice tests that cover the material one would expect to study in a typical advanced placement course and see on the exam itself six full length practice statistics exams are provided following each practice exam is an answer key and a detailed explanation for every question the explanations not only provide the correct response but also explain why none of the remaining answers is the best choice by studying the appropriate review sections taking the corresponding exams and studying the answer explanations you can discover your strengths and weaknesses and prepare yourself to score well on the ap statistics examination about the advanced placement program the advanced placement program consists of two components an ap course and an ap exam advanced placement examinations are offered each may at participating schools and multischool centers throughout the world the advanced placement program is designed to provide high school students with the opportunity to pursue college level studies while still attending high school in turn the participating colleges grant credit and or advanced placement to students who do well on the examination the ap statistics course is designed to represent the content of a typical introductory college course in statistics the full year course covers the skills and knowledge expected of students in the field of introductory statistics the course is intended for high school students who wish to complete studies equivalent to a one semester non calculus based college course in

statistics additional information about the ap program and the ap statistics exam is available by contacting ap services educational testing service p o box 6671 princeton nj 08541 6671 phone 609 771 7300 fax 609 530 0482 e mail apexams ets org website collegeboard com the ap statistics exam the ap statistics exam lasts 180 minutes and is divided into two sections i multiple choice 50 of your grade this 90 minute section is composed of 35 questions designed to test your proficiency in a wide variety of topics the questions test examinees ability to explore data plan a statistical study anticipate patterns and make statistical inferences ii free response a combined 50 of your grade this 90 minute section requires the student to answer four to seven open ended questions and to complete one investigative task question involving more extended reasoning each open ended question has been created to be answered in approximately 10 minutes the longer investigative task question has been created to be answered in approximately 30 minutes the questions require students to relate different content areas as they plan an extensive solution to a statistics or probability problem students are expected to use their analytical and organizational skills to formulate cogent answers in writing their responses it will be expected that students will show enough of their work to allow the readers to be able to follow their logic note that it is not necessary to write out routine statistical calculations that can be done on a calculator each student is expected to bring a calculator with statistical capabilities to the examination the computational capabilities of the calculator should include common univariate and bivariate summaries through linear regression the graphical capabilities of the calculator should include common univariate and bivariate displays such as boxplots histograms and scatterplots most graphing calculators on the market are acceptable non graphing calculators are allowed only if they have the computational capabilities described previously the following however are not permitted powerbooks and portable computers pocket organizers electronic writing pads pen input devices or devices with typewriter style or qwerty keyboards about the review sections as mentioned earlier this book has a review chapter for each of the four topics covered on the exam the following are the four review chapters in this book that cover the topics on the ap statistics exploring data planning a study anticipating patterns statistical inferences the review chapters provide a thorough discussion of the material tested on the exam by studying the review chapters and by taking the practice test s you can prepare yourself to score high on the ap statistics exam scoring the exam the multiple choice section of the exam is scored by crediting each correct answer with one point and deducting one fourth of a point for each incorrect answer

unanswered questions receive neither credit nor deduction the free response questions are graded by readers chosen from around the country for their familiarity with the ap program each free response question is read and scored with the reader providing the score on a 0 to 4 0 being the lowest and 4 the highest scale the free response questions are scored based on the statistical knowledge and communication the student used to answer the question the statistical knowledge criteria include identifying the important concepts of the problem and demonstrating statistical concepts and techniques that result in a correct solution of the problem the communication criteria include an explanation of what was done and why along with a statement of conclusions drawn once the free response questions have been graded by all of the readers the scores are converted the open ended questions count as 75 of the free response score the investigative task question counts as 25 scoring the multiple choice section for the multiple choice section use this formula to calculate your raw score $\text{number right} \times 1.4$ raw score round to the nearest whole number note do not include unanswered questions in the formula scoring the free response questions for the free response section use this formula to calculate your raw score $5 \text{ open ended questions} + 1 \text{ investigative task question} = 25$ raw score the composite score to obtain your composite score use the following method multiple choice raw score free response raw score raw score ap grades are interpreted as follows 5 extremely well qualified 4 well qualified 3 qualified 2 possibly qualified and 1 no recommendation scores that receive college credit and or advanced placement most colleges grant students who earn at least a 3 college credit and or advanced placement you should check with your school guidance office about specific college requirements studying for your ap examination it is never too early to start studying the earlier you begin the more time you will have to sharpen your skills do not procrastinate cramming is not an effective way to study since it does not allow you the time needed to learn the test material it is very important for you to choose the time and place for studying that works best for you some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep other students may study during the day while waiting on a line or even while eating lunch only you can determine when and where your study time will be most effective but be consistent and use your time wisely work out a study routine and stick to it when you take the practice exam s try to make your testing conditions as much like the actual test as possible turn your television and radio off and sit down at a quiet table free from distraction make sure to time yourself complete the practice test s score your test s and

thoroughly review the explanations for the questions you answered incorrectly however do not review too much during any one sitting concentrate on one problem area at a time by reviewing the question and explanation and by studying our review s until you are confident that you completely understand the material since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing however do not make miscellaneous notes on your answer sheet mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering keep track of your scores this will enable you to gauge your progress and discover general weaknesses in particular sections you should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas to get the most out of your studying time we recommend that you follow the study schedule it details how you can best budget your time test taking tips although you may be unfamiliar with tests such as the advanced placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties listed below are ways to help yourself become accustomed to the ap exam some of which may also be applied to other standardized tests become comfortable with the format of the ap examination in statistics when you are practicing to take the exam s simulate the conditions under which you will be taking the actual test s you should practice under the same time constraints as well stay calm and pace yourself after simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently know the directions and format for each section of the exam familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the ap exam to avoid anxiety and the mistakes caused by being anxious work on the easier questions first if you find yourself working too long on one question make a mark next to it in your test booklet and continue after you have answered all of the questions that you can go back to the ones you have skipped use the process of elimination when you are unsure of an answer if you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess if you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer questions not answered will not be counted be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet since the multiple choice section is graded

by machine marking the wrong answer will throw off your score

teaching statistics in school mathematics challenges for teaching and teacher education results from the joint icmi iase study teaching statistics in school mathematics challenges for teaching and teacher education oriented to analyse the teaching of statistics in school and to recommend improvements in the training of mathematics teachers to encourage success in preparing statistically literate students the volume provides a picture of the current situation in both the teaching of school statistics and the pre service education of mathematics teachers a primary goal of teaching statistics in school mathematics challenges for teaching and teacher education is to describe the essential elements of statistics teacher s professional knowledge and their learning experiences moreover a research agenda that invites new research while building

from current knowledge is developed recommendations about strategies and materials available to train prospective teachers in university and in service teachers who have not been adequately prepared are also accessible to the reader

this book is a timely and critical introduction for those interested in what data science is and isn't and how it should be applied the language is conversational and the content is accessible for readers without a quantitative or computational background but at the same time it is also a practical overview of the field for the more technical readers the overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes the book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project upon finishing this book the reader should be asking more questions than i have answered this book is therefore a practising scientist's approach to explaining data science through questions and examples

pressing forward increasing and expanding rigor and relevance in america's high schools is organized to place secondary education specifically the goals of preparing young adults to be college and career ready in contemporary perspective emphasizing the changing global economy and trends in policy and practice high school students must be equipped with tools they need during and beyond high school for mapping their futures in a global and flat world that demands workers prepared to take up 21st century careers following thomas freidman and other writers on the topic this book takes as its core premise that the world has been irrevocably altered by technology and that technology takes a prominent role in shaping post secondary education and career opportunities the challenges facing education and educators in a flattened world can best be addressed by creating opportunities for students who are ready for a world in which they are expected to pursue learning throughout their lifetimes understand and use technology engage in active civic lives function well in ethnically diverse workplace settings and be willing to take risks most of all however these individuals must be very well prepared during high school by taking advanced level mathematics science and other challenging coursework while at the same time actively engaging in collaborative creative endeavors that prepare them to continuously reinvent themselves to stay ahead of automation and outsourcing the book will be a unique and useful contribution to the education reform and policy literature as it examines secondary education at an historical

moment the convergence of significant education spending and focus on high school reform developed from diverse authors research programs on secondary education the chapters in this volume highlight both changing and steadfast features of high schools questioning if attempts to foster change whether tinkering around the edges or inventing a new way adequately address shortcomings in equity and excellence found in American high schools

this book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the advanced placement and the international baccalaureate programs and asks how advanced studies can be significantly improved in general it also examines two of the core issues surrounding these programs they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education by looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs this report provides teachers parents curriculum developers administrators college science and mathematics faculty and the educational research community with a detailed assessment that can be used to guide change within advanced study programs

ipads are powerful tools for engaging students encouraging creativity stimulating critical thinking and making significant strides in learning this book is part of a two book set that allows educators to realize the full potential of the ipad over 200 highly rated apps are covered with specific ideas for classroom activities and teaching strategies descriptions include ideas for using ipads in classrooms where each student owns an ipad as well as where there is just a small number of ipads or even just a single device the first chapter of this book specifically discusses how to promote discovery learning engagement understanding and creativity in ways that enhance the learning experience of all students each subsequent chapter is dedicated to apps that have value to the following subject areas mathematics science art music health and physical education and english in consideration of education budgets all the apps are free or low cost the information in this book is appropriate for K12 teachers university professors media specialists K12 administrators parents and students
