what is there to see in invisible artworks empty books or blank screens how do formal absences generate meaning constructing an argument by way of montage this book is an annotated inventory of textual visual and conceptual figures of absence spanning different media it reveals a creative tradition that uses absence not as a negative aesthetic category but as a productive state of radical indeterminacy with its own politics and poetics although post structuralism highlighted the importance of what is offstage lost forgotten hidden or discarded silent or silenced the poetics and politics of absence much like its ethics and aesthetics have rarely been discussed across media and disciplines this book proposes the concept of radical absence to describe a certain tradition of resistance to ontology predication and representation contesting their reliance on a metaphysics of presence apophatic speech empty signifiers and figural voids are some of the figures through which radical absence becomes apparent with unprecedented intensity in twentieth century theory literature film and the arts phantasmatic and outrageous such figures play with creative strategies of dematerialization irony and other forms of discursive undoing therefore absence becomes more than a simple theme it reflects back on the medium and the meaning making conditions under which it operates elusive and imprecise as an object of study absence requires more subtle and flexible

epistemological frameworks than have been available to date this monograph proposes we think of it not only as a counter concept for presence but also and perhaps more productively as infinite spacing deferral fragmentation and displacement
