of human suffering and environmental damage. The exploitation of labor, the displacement of indigenous populations, and the unchecked pollution of natural resources raise critical questions about the ethics of unchecked capitalist expansion. Moreover, the exclusionary policies and discriminatory practices towards immigrants and minorities highlight the systemic inequalities embedded within the American narrative. The chapter challenges us to reflect on the ethical responsibilities of individuals and institutions to ensure a truly inclusive and equitable society.

the articles brought together in this volume deal with muslim perceptions and uses of the bible in its wider sense including the hebrew bible or old testament as well as the new testament albeit with an emphasis on the former scripture while muslims consider the earlier revelations to the people of the book to have been altered to some extent by the jews and the christians and abrogated by the qur ān god s final dispensation to humankind the bible is at the same time venerated in view of its divine origin and questioning this divine origin is tantamount to unbelief muslim scholars approached and used the bible for a variety of purposes and in different ways thus muslim historians regularly relied on biblical materials as their primary source for the pre islamic period when discussing the creation as well as the history of the israelites and the prophets preceding mu ammad authors seeking to polemicize against jews and christians were primarily interested in the presumed biblical annunciations of mu ammad and his religion and or in perceived contradictions and cases of internal abrogation in the bible these various concerns resulted

from and had an impact on the ways in which muslim authors accessed the scriptures
