In this engaging and wide ranging new book, Nikk Effingham provides an introduction to contemporary ontology, the study of what exists and its importance for philosophy today. He covers the key topics in the field from the ontology of holes, numbers and possible worlds to space, time and the ontology of material objects. For instance, whether there are composite objects such as tables, chairs or even you and me. While starting from the basics, every chapter is up to date with the most recent developments in the field, introducing both longstanding theories and cutting edge advances as well as discussing the latest issues in ontology. Effingham also helpfully deals in depth with different methodological principles including theory choice, Quinean ontological commitment and Meinongianism and introduces them alongside an example ontological theory that puts them into practice. This accessible and comprehensive introduction will be essential reading for upper level undergraduate and post graduate students as well as any reader interested in the present state of the subject.

Philosophical Devices introduces the technical ideas that are taken for granted in contemporary philosophical writing. What constitutes successful thinking in business? What are the techniques used by some of the top minds in the business world to solve problems and create value? In *Diamonds*, Mihnea Moldoveanu and Roger Martin, creators of the Integrative Thinking Curriculum at the Rotman School of Management, draw upon numerous case studies and interviews as well as theories and models from cognitive psychology, epistemology, analytic philosophy and semiotics to present a new conception of successful intelligence that is immediately applicable to business situations. The Diamond or Dialogical Mind is characterized by a number of qualities: the ability to simultaneously hold opposing plans, models and courses of action in mind while retaining the ability to act; bi-stability; logical depth and informational breadth in one's thinking processes; meliorism, the ability to choose among various representations of the world; the self and others; choicefulness and the capacity to think about how to analyse and solve a problem while at the same time thinking about the problem itself. Polyphony. The authors discuss these concepts in detail and provide examples and exercises throughout to encourage readers to examine and re-engineer their own thought patterns to develop these qualities and cultivate their own diamonds.
