most legal expert systems attempt to implement complex models of legal reasoning but the utility of a legal expert system lies not in the extent to which it simulates a lawyer s approach to a legal problem but in the quality of its predictions and of its arguments a complex model of legal reasoning is not necessary a successful legal expert system can be based upon a simplified model of legal reasoning some researchers have based their systems upon a jurisprudential approach to the law yet lawyers are patently able to operate without any jurisprudential insight a

useful legal expert system should be capable of producing advice similar to that which one might get from a lawyer so it should operate at the same pragmatic level of abstraction as does a lawyer not at the more philosophical level of jurisprudence a legal expert system called shyster has been developed to demonstrate that a useful legal expert system can be based upon a pragmatic approach to the law shyster has a simple representation structure which simplifies the problem of knowledge acquisition yet this structure is complex enough for shyster to produce useful advice shyster is a case based legal expert system although it has been designed so that it can be linked with a rule based system to form a hybrid legal expert system its advice is based upon an examination of and an argument about the similarities and differences between cases shyster attempts to model the way in which lawyers argue with cases but it does not attempt to model the way in which lawyers decide which cases to use in those arguments instead it employs statistical techniques to quantify the similarity between cases it decides which cases to use in argument and what prediction it will make on the basis of that similarity measure shyster is of a general design it can provide advice in areas of case law that have been specified by a legal expert using a specification language hence it can operate in different legal domains four different and disparate areas of law have been specified for shyster and its operation has been tested in each of those domains testing of shyster in these four domains indicates that it is exceptionally good at predicting results and fairly good at choosing cases with which to construct its arguments shyster demonstrates the viability of a pragmatic approach to legal expert system design

author of cult classics the pumpkin plan and the toilet paper entrepreneur offers a simple counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability conventional accounting uses the logical albeit flawed formula sales expenses profit the problem is businesses are run by humans and humans aren't always logical serial entrepreneur mike michalowicz has developed a behavioral approach to accounting to flip the formula sales profit expenses just as the most effective weight loss strategy is to limit portions by using smaller plates michalowicz shows that by taking profit first and apportioning only what remains for expenses entrepreneurs will transform their businesses from cash eating monsters to profitable cash cows using michalowicz's profit first system readers will learn that following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances a small profitable business can be worth much more than a large business surviving on its top line businesses that attain early and sustained profitability have a better shot at achieving long term growth with dozens of case studies practical step by step advice and his signature sense of humor michalowicz has the game changing roadmap for any entrepreneur to make money they always dreamed of

an examination of creative systems in structural and construction engineering taken from conference proceedings topics covered range from construction methods safety and quality to seismic response of structural elements and soils and pavement analysis
