the topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines given these circumstances the particular associations and connotations of the terms transfer and interference in each of these areas are legion with resultant differences in meaning in the disparate literature on these subjects and yet it is in one way or another contact and interaction of languages in the speaker hearer and learner in language acquisition contexts as well as in society in general which is basic to these two concepts throughout the various disciplines the discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena in light of all this a bibliography cannot at present avoid being highly selective in order to demarcate an interdisciplinary area of research in its own right and with its own status the establishment of such an area is one of our main aims the focus of interest in this bibliography admittedly is directed towards the psycholinguistics of language contact and interaction

the handbooks of applied linguistics provide a state of the art description of established and emerging areas of applied linguistics each volume gives an overview of the field explains the most important traditions and their findings identifies the gaps in current research and gives perspectives for future directions

this book considers the strategies used by successful language learners in the light of current thinking and research

the book addresses one of the key controversies in teaching foreign language grammar which is the utility of production oriented instruction as exemplified in the ppp sequence and comprehension based teaching as implemented in interpretation tasks and processing instruction it provides a thorough overview of issues related to learning and teaching grammar with a particular focus on input oriented approaches and reports the findings of four studies which sought to compare their effects with instruction based on different forms of output practice the findings serve as a basis for guidelines on how the two options can be successfully combined in the classroom

the essays in this volume explore communication across cultures using an interdisciplinary approach to language teaching and learning mediated by the growing field of educational linguistics topics include the use of english as a medium of wider communication and the growth of national varieties of english throughout the world an international array of distinguished contributors includes scholars from china great britain hong kong india israel nigeria singapore taiwan ukraine and the united states this collection suggests that language diversity is a unifying force in a globally interdependent world

what emerges from kachru s fine work is the potential demarcation of an entire field rather than merely the fruitful exploration of a topic kachru is to be congratulated for having taken us as far as he already has and for doing so in so stimulating and so productive a fashion world englishes a potent addition to theoretical sociolinguistic attitudinal and methodological explorations vis à vis the spread and functions of and innovations in english from the viewpoint of a non western scholar the language teacher winner of the joint first prize duke of edinburgh english language book competition of the english speaking union of the commonwealth 1987
