this book offers a discerning narrative on the spectacular rise and fall of the so called celtic tiger economy it depicts ireland as a micro state with a unique reliance on foreign assisted businesses driven in part by a favourable taxation regime it shows that rent seeking by trades unions and property developers contributed to the fall since 2002 although the country s highly centralized government s pre disposition to lobbying has yielded international successes it has also resulted in recurring self inflicted crises since 1970 this volume shows how ireland s export led growth is associated more with the attraction of foreign assisted businesses than with the development of critical masses of internationally competitive indigenous businesses although the success of foreign assisted businesses in the pharmaceutical ict and finance sectors has been influenced by tax advantages many of these businesses have been involved in highly productive activity in ireland over a number of decades the problem of rent seeking is shown to have undermined irish competitiveness in the internationally traded and sheltered sectors the irish policy mind set is shown to lean towards

distribution rather than growth while this has been advantageous for how ireland inc interacts with other governments and international businesses it has also resulted in a failure to resist the destructive effects of capture by lobbies in conclusion this book considers future opportunities offered by the eu s smart specialization policy and future threats from increased international tax competition it argues that unless irish citizens and policymakers change deep seated attitudes and mind sets towards business development the country s performance for the next number of decades will more likely resemble serial under achievement than that of a high performing eu state

this book explores what remains an under studied aspect of samuel johnson s profile as a person and writer namely his attitude to social improvement the interpretive framework provided here is cross disciplinary and applies perspectives from social and cultural history legal history architectural history and of course english literature this allows johnson s writings to be read against the peculiarities of their historical milieu and reveals johnson in a new light as an advocate of social improvement for

human betterment considering the multiplicity of narrative modes that have been employed the book points to the blurred boundaries and overlapping between history testimony and fiction and argues that a future biography of samuel johnson has to recognise that throughout his life he valued the utilitarian aspect of his manifesto as a writer to impart a more charitable attitude in the pursuit of a more caring society
