language learning provides an introduction to language development that differs from existing books in that it traces language and cognitive development together with the associated debates from babyhood through the school years of middle childhood and adolescence into adulthood and the world of work increasingly the global trend is towards learning to speak read and write more than one language language learning is a comprehensive book that includes descriptions and discussions of learning more than one

one of the most profound insights of the dynamic systems perspective is that new structures resulting from the developmental process do not need to be planned in advance nor is it necessary to have these structures represented in genetic or neurological templates prior to their emergence rather new structures can emerge as components of the individual and the environment self organize that is as they mutually constrain each other's actions new patterns and structures may arise this theoretical possibility brings into developmental theory the important concept of indeterminism the possibility that developmental outcomes may not be predictable in any simple linear causal way from their antecedents this is the first book to take a critical and serious look at the role of indeterminism in psychological and behavioral development what is the source of this indeterminism what is its role in developmental change is it merely the result of incomplete observational data or error in measurement it reviews the concepts of indeterminism and determinism in their historical philosophical and theoretical perspectives particularly in relation to dynamic systems thinking and applies these general ideas to systems of nonverbal communication stressing the indeterminacy inherent to symbols and meaning making in social systems several chapters address the issue of indeterminism from metaphorical modeling and narrative perspectives others discuss those indeterministic processes within the individual related to emotional social and cognitive development

as various contemporary groups use the language of motherhood to advance their political causes maternal rhetoric has become very visible in the american political discourse of late yet while it has long been recognized that women have invoked their political status as mothers to organize and authorize their political action in the past scholars have only just begun to examine the recent reemergence of this frame this book describes the wide variety of political causes that mothers are organizing to address and analyses whether ideologically conservative organizations are disproportionately represented among groups using motherhood to mobilize women stavrianos examines the use of maternal discourses in closer detail through a comparative case study of five groups using motherhood as their primary frame for collective political action mothers against drunk driving million mom march mothers against illegal aliens mainstreet moms organize or bust and mothers in charge scholars interested in women and politics interest group politics social movements political behavior women s studies motherhood studies and framing strategies will find this book

noteworthy as it adds to a growing body of literature exploring the use of motherhood as an emerging political frame and to the interdisciplinary discussion of contemporary discourses of motherhood
