what a wonderful resource doody's medical reviews the 4th edition is unique in recognizing the rapid changes in both the causes of crises and the latest attempts to provide timely multidisciplinary approaches to the practice of this growing specialty evident throughout this edition is the call to identify crisis leadership among the increasingly talented base of nurses who have responsibility to move the profession to recognize and accept that they can be advocates for better planning coordination education and training frederick m burkle jr md mph dtm phd hon faap facep senior fellow scientist harvard humanitarian initiative harvard university t c chan school of public health from the foreword this impressive edition builds upon the solid foundation of the first three award winning editions with an expanded focus on climate change related disasters globalization and its implications for emerging and re emerging infectious diseases the accommodation of high risk high vulnerability populations and the potential for disaster arising from a world witnessing increasing community violence and civil unrest patricia m davidson phd med rn faan professor dean johns hopkins school of nursing from the foreword the contributing authors read like a who's who of disaster leaders they lend their special expertise and insights which are supported and elucidated by cogent learning strategies in the use of case studies student questions and packed content in all areas of disaster participation preparedness policies and research for over 16 years this book has been the hallmark text in its field and this edition proves to be the best ever loretta c ford rn pnp edd dean emeritus university of rochester school of nursing founder of the national nurse practitioner program member national women's hall of fame featuring the most current valid and reliable evidence based content available this three time ajn winner once again presents an unparalleled resource for disaster and emergency preparedness disasters lay heavy burdens upon healthcare systems that stretch all

levels of society while natural and man made disasters are not new the global nature rate type and totality of their impact has only increased the fourth edition of this foundational text uniquely addresses the rapid changes in these crises and analyzes the latest attempts to provide timely multidisciplinary healthcare nurses consistently comprise seventy or more percent of responders to local national regional and global crises and represent a potentially untapped resource to achieve surge capacity goals and optimize population health outcomes considering recent world events and increasing geopolitical tensions disaster nursing and emergency preparedness fourth edition now features expanded content on the ubiquitous threat of terrorism potential detonation of thermonuclear weapons emerging and reemerging infectious diseases and increasing frequency and intensity of natural disasters from climate change this text promotes competency based expert nursing care during disasters and positive health outcomes for small and large populations consistent with the federal disaster response framework whenever possible content is mapped to published core competencies for preparing health professions students for response to terrorism disaster events and public health emergencies the fourth edition retains the clearly organized format in each chapter that includes an overview learning objectives a summary and case study with reflective questions new to the fourth edition addresses the most recent landmark agreements sendai framework for disaster risk reduction 2015 2030 the united nations sustainable development goals and the paris climate agreement covers public health emergencies involving community violence and civil unrest expands coverage of planning for and accommodating high risk high vulnerability populations aligns with the u s national health security strategy and the national planning frameworks provides focused content on medical countermeasures includes an improved instructor package with guide powerpoint slides and case studies with questions for reflection in every chapter

this book creates new ground for all health professionals working in cancer care to read enjoy look at and question their practice caroline adcock clinical practice educator haematology and oncology royal shrewsbury hospital cancer and cancer care is a complete study of cancer the care of people with the disease and its impact on everyday life addressing the physical and psychosocial aspects of the illness in detail it covers all fundamental aspects of cancer diagnosis treatment survival and aspects of psychosocial support for all those affected by cancer patients their families and their healthcare providers chapters include a review of the latest theory and evidence on over 30 separate topic areas reflective questions

which challenge readers to reappraise what they have learned chapter overviews and chapter summaries which highlight the key points the book is essential reading for all those on cancer care courses at undergraduate and postgraduate level it will be valuable reading for nurses oncologists psychologists social workers and all healthcare practitioners and researchers working with people affected by cancer

this volume focuses on the issues african american males face not only as participants in athletic competition as student athletes but also as coaches administrators and academic support staff it will serve as a valuable resource for educational policy makers especially athletic association personnel i e ncaa and other constituents

why would highly skilled well trained pilots make errors that lead to accidents when they had safely completed many thousands of previous flights the majority of all aviation accidents are attributed primarily to human error but this is often misinterpreted as evidence of lack of skill vigilance or conscientiousness of the pilots the limits of expertise is a fresh look at the causes of pilot error and aviation accidents arguing that accidents can be understood only in the context of how the overall aviation system operates the authors analyzed in great depth the 19 major u s airline accidents from 1991 2000 in which the national transportation safety board ntsb found crew error to be a causal factor each accident is reviewed in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step the approach is guided by extensive evidence from cognitive psychology that human skill and error are opposite sides of the same coin the book examines the ways in which competing task demands ambiguity and organizational pressures interact with cognitive processes to make all experts vulnerable to characteristic forms of error the final chapter identifies themes cutting across the accidents discusses the role of chance criticizes simplistic concepts of causality of accidents and suggests ways to reduce vulnerability to these catastrophes the authors complementary experience allowed a unique approach to the study accident investigation with the ntsb cognitive psychology research both in the lab and in the field enormous first hand experience of piloting and application of aviation psychology in both civil and military operations this combination allowed the authors to examine and explain the domain specific aspects of aviation operations and to extend advances in basic research in cognition to complex issues of human performance in the real world although the limits of expertise is directed to aviation operations the implications are clear for understanding the decision processes skilled performance and errors of professionals

in many domains including medicine
