suffers from innumeracy in its general population math avoidance among high school students and 50 percent failure among college calculus students causes include starvation budgets in the school mental attrition by television parents who don't like math there's another unrecognized cause of failure misconception of the nature of mathematics i think the specific reference to the united states may be omitted it is really a worldwide problem moreover there is one more consequence of math avoidance and misconception good mathematical approaches are sometimes applied incorrectly particularly the methods of statistics are often misused for different goals applying mathematical methods is similar to using nuclear power the final results depend on the competence of the user i try to convince my readers to apply the energy of mathematics with consideration
