this book comes at a time when the egyptian nation is facing deep divisions about the notion and definition of revolution the articles here aim to look at the 2011 egyptian revolution and the central role of women within it from a critical perspective our objective is not to glorify the revolution or inflate the role of egyptian women within its parameters but to analyse and critique both the achievements and setbacks of this revolution and the contributions of various strata of women to the revolutionary process which is still unfolding women s participation is part of a broader picture and needs to be considered as an essential element of the ongoing struggle for freedom and social justice not in isolation of it the reader will soon realise that the authors in this book perhaps agree on one profound aspect of the 2011 revolution the struggle is ongoing and the revolutionary process is still being shaped and recreated the story of the egyptian revolution still resists any kind of closure despite the ascendance of the military regime once again to power the years to come will no doubt witness an

this book challenges the correspondence theory of judicial fact construction that legal rules resemble and subsume facts out there and instead provides an account of judicial fact construction through legally produced times or adjudicative temporalities that structure legal subject and event formation in legal judgement drawing on bergsonian and gadamerian theories of time this book details how certain adjudicative temporalities can produce fully willed and autonomous subjects through time framed legal events in effect the paradigmatic liberal legal subject or how alternative adjudicative temporalities may structure legal subjects that are situated and constituted by social structures the consequences of this novel account of legal judgement are fourfold the first is that judicial fact construction is not exclusively determined by the legal rule s but by adjudication s production of temporalities the second is that the selection between different adjudicative temporalities is generally indeterminate though influenced by wider social structures as will be argued social structures framed as a particular type of past produced by certain adjudicative temporalities may either be incorporated in the rendering of the legal event or elided the third is that with the book s focus on criminal law different deployments of adjudicative temporalities effect responsibility ascription finally it is argued that the demystification of time as that which structures event and subject formation reveals another way in which to uncover the politics of legal judgement and the potential for its transformative potential through either its inclusion or its elision of social structures in adjudication s determination of facts this book will be of interest to students and scholars in the field of legal judgement legal theory and jurisprudence

from moscow the world looks different it is through understanding how russia sees the world and its place in it that the west can best meet the russian challenge russia and the west are like neighbors who never seem able to understand each other a major reason this book argues is that western leaders tend to think that russia should act as a rational western nation even though russian leaders for centuries have thought and acted based on their country's much different history and traditions russia through western eyes is unpredictable and irrational when in fact its leaders from the czars to putin almost always act in their own very predictable and rational ways for western leaders to try to engage with russia without attempting to understand how russians look at the world is a recipe for repeated disappointment and frequent crises keir giles a senior expert on russia at britain's prestigious chatham house describes how russian leaders have used consistent doctrinal and strategic approaches to the rest of the world these approaches may seem deeply alien in the west but understanding them is essential for successful engagement with moscow giles argues that understanding how moscow's leaders think not just vladimir putin but his predecessors and eventual successors will help their counterparts in the west develop a less crisis prone and more productive relationship with russia
