unep year book 2009 new science and developments in our changing environment presents work in progress on scientific understanding of global environmental change as well as foresight about possible issues on the horizon the aim is to raise awareness of the interlinkages among environmental issues that can accelerate the rates of change and threaten human wellbeing the chapters of the year book track the same trajectory as our awareness of environmental change transformations are inherent to this trajectory and are taking place on many fronts from industrial agriculture to eco agriculture from a wasteful society towards a resource efficient one and from a triad of competing interests among civil society the private sector and governments to a more cooperative model based on mutual benefits

this handbook is an in depth guide to the practical aspects of materials and corrosion engineering in the energy and chemical industries the book covers materials corrosion welding heat treatment coating test and inspection and mechanical design and integrity a central focus is placed on industrial requirements including codes standards regulations and specifications that practicing material and corrosion engineers and technicians face in all roles and in all areas of responsibility the comprehensive resource provides expert guidance on general corrosion mechanisms and recommends materials for the control and prevention of corrosion damage and offers readers industry tested best practices rationales and case studies

a guide to the press of the united kingdom and to the principal publications of europe australia the far east gulf states and the u s a

carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland. It gives location, date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail. It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated. It also preserves information about collections which have since been lost, sold or otherwise dispersed.

This vivid introduction to economic geology not only describes the most important deposit types but also the processes involved in their formation: magmatic, hydrothermal and sedimentary processes as well as weathering and alteration are explained in the framework of plate tectonics and the history of the Earth. The chapter about fossil fuels includes unconventional deposits and the much debated fracking. Other topics covered are exploration, mining and economic aspects like commodity prices.
