software engineering education is an important often controversial issue in the education of information technology professionals it is of concern at all levels of education whether undergraduate post graduate or during the working life of professionals in the field this publication gives perspectives from academic institutions industry and education bodies from many different countries several papers provide actual curricula based on innovative ideas and modern programming paradigms various aspects of project work as an important component of the educational process are also covered and the uses of software tools in the software industry and education are discussed the book provides a valuable source of information for all those interested and involved in software engineering education

software engineering is a term which was coined in the late 1960 s as the theme for a workshop on the problems involved in producing software that could be developed economically and would run reliably on real machines even now software engineering is more of a wish than a reality but the last few years have seen an increased awareness of the need to apply an engineering type discipline to the design and construction of software systems many new proposals have been made for the management of software development and maintenance and many methodologies have been suggested for improving the programming process as these problems and solutions become better understood there is a growing need to teach these concepts to students and to practicing professionals as a prelude to the educational process it is necessary to gain an understanding of the software design and development process in industry and government to define the appropriate job categories and to identify the fundamental content areas of software

engineering the need for quality education in software engineering is now recognized by practitioners and educators alike and various educational endeavors in this area are now being formulated yet discussions we had had over the past year or so led us to believe that there was insufficient contact between practitioners and educators with the resultant danger that each group would go off in separate ways rather than working together
