why on earth would two history nerds use their own free time to write another us history textbook well that intelligent human is the right question this work breaks from the traditional memorization of who what when where and focuses on why and how the former is popular in schools due to its efficiency in quantification for testing you re either right or wrong about remembering facts but it s so boring that most students turn off their brains once they set foot in the class and that habit continues well into old age if not recognized and corrected why and how are more subjective therefore harder to grade but with their asking people become re centered in our collective story where they belong only then can proper context be understood and criticism and perspective be applied we believe this approach to be the missing link in our education and understanding of current issues norms and discussion points hopefully after reading this work each reader s critical thinking will activate around all history permanently that will certainly aid humanity s evolution and communication wait does that mean this book can be categorized as self help argue away
