the twentieth anniversary edition of a transformative blueprint for ancestral healing featuring new material and gateways from the renowned herbalist natural health expert and healer of women's bodies and souls this book was one of the first that helped me start practices as a young woman that focused on my body and spirit as one jada pinkett smith through extraordinary meditations affirmations holistic healing plant based medicine kmt temple teachings and the rites of passage guidance queen afua teaches us how to love and rejoice in our bodies by spiritualizing the words we speak the foods we eat the relationships we attract the spaces we live and work in and the transcendent woman spirit we manifest with love wisdom and passion queen afua guides us to accept our mission and our mantle as sacred women to heal ourselves the generations of women in our families our communities and our world

did you know that many people who are born as a single child began life accompanied by a brother or sister that died during pregnancy and vanished leaving no trace whatsoever and did you know that the frequency which this occurs is amazingly high it's a well known fact verified by science for some decades now that a 10 of babies who are born started their life as a part of a twin pregnancy and then lost their sibling during the first months of gestation this phenomenon had remained purely statistical until quite recently only in the last few years has psychology started to become interested in the effects that this experience may have on the surviving twin what might the consequences be of spending the first weeks or months of one's life with a twin in utero but then to suffer their loss and be born alone how can person process and assimilate this primary experience when frequently it is ignored and relegated to the unconscious levels of our self the answers to these and other questions constitute the core of this book which also includes around fifty testimonies that enable us to listen firsthand to the multiple manifestations that result from the experience of being a lone twin

winner of the 2024 phi beta kappa award for science a new york times editors choice a science news favorite book of 2023 fungi sicken us and fungi sustain us in either case we ignore them at our peril elizabeth kolbert new york review of books a prescient warning about the mysterious and deadly world of fungi and how to avert further loss across species

including our own fungi are everywhere most are harmless some are helpful a few are killers collectively infectious fungi are the most devastating agents of disease on earth and a fungus that can persist in the environment without its host is here to stay in blight emily monosson documents how trade travel and a changing climate are making us all more vulnerable to invasion populations of bats frogs and salamanders face extinction in the northwest america s beloved national parks are covered with the spindly corpses of whitebark pines food crops are under siege threatening our coffee bananas and wheat and more broadly our global food security candida auris drug resistant and resilient infects hospital patients and those with weakened immune systems coccidioides which lives in drier dusty regions may cause infection in apparently healthy people the horrors go on yet prevention is not impossible tracing the history of fungal spread and the most recent discoveries in the field monosson meets scientists who are working tirelessly to protect species under threat and whose innovative approaches to fungal invasion have the potential to save human lives delving into case studies at once fascinating sobering and hopeful blight serves as a wake up call a reminder of the delicate interconnectedness of the natural world and a lesson in seeing life on our planet with renewed humility and awe

in the twenty first century because of climate change and other human activities many animal species have become extinct and many others are at risk of extinction once they are gone we cannot bring them back or can we with techniques such as cloning scientists want to reverse extinction and return lost species to the wild some scientists want to create clones of recently extinct animals while others want to make new hybrid animals many people are opposed to de extinction some critics say that the work diverts attention from efforts to save species that are endangered others say that de extinction amounts to scientists playing god explore the pros and cons of de extinction and the cutting edge science that makes it possible

grocery lists checklists to do lists lots of people love and live by lists and parents are no exception today s families are busier than ever and moms don t have the time or energy to search and scramble for the parenting information they are desperately seeking how much should my child be sleeping at this age what toys will most benefit my child what items are truly essential in furnishing a nursery what questions should i ask a potential caregiver what are the signs of a family

friendly restaurant the answers to these questions and more than a hundred others are at a mom's fingertips with a mom's ultimate book of lists this handy practical reference guide will save time money and sanity for today's busy women

camella is a long time practitioner of yoga and ordained swami in the kriya lineage she has been teaching prenatal yoga for over a decade and established a women's support group to encourage women to nurture and help one another she lives with her two teenage sons in northern california this is her second book on yoga

a personal intimate account of the extraordinary ways that today's families are being created from adoption and assisted reproduction to gay and straight parents coupled and single and multi parent families the stories in modern families explain how individuals make unconventional families by accessing a broad range of technological medical and legal choices that expand our definitions of parenting and kinship joshua gamson introduces us to a child with two mothers made with one mother's egg and the sperm of a man none of them has ever met another born in ethiopia delivered by his natural grandmother to an orphanage after both his parents died in close succession and then to the arms of his mother who is raising him solo these tales are deeply personal and political the process of forming these families involved jumping tremendous hurdles social conventions legal and medical institutions with heightened intention and inventiveness within and across multiple inequities and privileges yet each of these families however they came to be shares the same universal joys that all families share a companion for all those who choose to navigate the world of modern kinship modern families provides a fascinating look at the remarkable range of experiences that is broadening the very idea of family booklist
