in the last few years there has been an increased advancement and evolution in semantic web and information systems in a variety of fields the integration of these approaches to ontology engineering sophisticated methods and algorithms for open linked data extraction and advanced decision making creates new opportunities for a bright future innovations developments and applications of semantic and information systems is a critical scholarly resource that discusses integrated methods of research and analytics in information technology featuring coverage on a broad range of topics such as cognitive computing artificial intelligence machine learning data analysis and algorithms this book is geared towards researchers academicians and professionals seeking current information on semantic web and information systems

the increasing power of computer technologies the evolution of software engineering and the advent of the intelligent transport systems has prompted traf c simulation to

become one of the most used approaches for traf c analysis in s port of the design and evaluation of traf c systems the ability of traf c simulation to emulate the time variability of traf c phenomena makes it a unique tool for capturing the complexity of traf c systems in recent years traf c simulation and namely microscopic traf c simulation has moved from the academic to the professional world a wide variety of traf c simulation software is currently available on the market and it is utilized by thousands of users consultants researchers and public agencies microscopic traf c simulation based on the emulation of traf c ows from the dynamics of individual vehicles is becoming one the most attractive approaches however traf c simulation still lacks a uni ed treatment dozens of papers on theory and applications are published in scienti c journals every year a search of simulation related papers and workshops through the proceedings of the last annual trb meetings would support this assertion as would a review of the minutes from speci cally dedicated meetings such as the international symposiums on traf c simulation yokohama 2002 lausanne 2006 brisbane 2008 or the international workshops on traf c modeling and simulation tucson 2001 barcelona 2003 sedona 2005 graz 2008 yet the only comprehensive treatment of the subject to be found so far is in the user s manuals of various software products
