the real history of israel and the palestinians no history is so disputed as the history of israel some see israel s creation as a dramatic act of justice for the jewish people others insist that it was a crime against palestine s arabs author david brog untangles the facts from the myths to reveal the truth about the arab israeli conflict in reclaiming israel s history you ll learn how the jewish people have maintained a continual presence in the land of israel for over 3 000 years despite centuries of

roman byzantine and muslim persecution how the romans invented the word palestine as a way to sever the connection between the jewish people and their land and how subsequent conquerors doubled down on this strategy how modern jewish immigration to palestine did not displace arabs but instead sparked an arab population boom and the largely untold story of how the leader of palestine's arabs collaborated with the nazis to murder jews in europe before they could reach their ancestral homeland you'll also learn why most of palestine's arabs never identified themselves as palestinians until after the 1967 war the extraordinary lengths to which israel's military goes to protect palestinian civilians and the high price israel's soldiers pay for this morality and how the palestinians have on separate occasions rejected israel's offers of a palestinian state in virtually all of the west bank and gaza brog frankly admits to israel's sins both large and small but notes that in any fair minded analysis these have been far outweighed by israel's commitment to western values including freedom democracy and human rights honest provocative and timely especially given rising anti semitism and the aggressive delegitimization of israel david brog's reclaiming israel's history is the book for every reader who wants to understand what is really happening in the middle east

this history of the foundational war in the arab israeli conflict is groundbreaking objective and deeply revisionist besides the military account it also focuses on the war's political dimensions historian morris probes the motives and aims of the protagonists on the basis of newly opened israeli and western documentation the arab side where the archives are still closed is illuminated with the help of intelligence and diplomatic materials morris stresses the jihadi character of the two stage arab assault on the jewish community in palestine he examines the dialectic

between the war's military and political developments and highlights the military impetus in the creation of the palestinian refugee problem he looks both at high politics and general staff decision making and at the nitty gritty of combat in the battles that resulted in the emergence of the state of israel and the humiliation of the arab world a humiliation that underlies the continued arab antagonism toward israel résumé de l'éditeur

with the images of the israeli palestinian conflict so dominant in our minds walking for leisure is the one activity probably least associated with the west bank region but stefan szepesi's book wanders well off the beaten track of palestine as only a synonym for occupation and strife exploring its inspiring natural and cultural landscape its intriguing past and present and the hospitality of its people the book takes first time walkers and experienced hikers as well as armchair explorers through palestine's steep desert gorges along its tiny herders trails and over its quiet dirt roads running past silver green olive groves with side stories and anecdotes on heritage history culture and daily life in the west bank the book ventures into the traits and character of palestine today beyond the 250 km of walking trails described and mapped in detail throughout the book walking palestine offers a wealth of practical walking tips including references to local guides the west bank's best leisure spots and countryside restaurants and the most charming places to spend the night

a winner of the association for the study of the middle east and africa 2023 bernard lewis prize landes a medievalist and historian of apocalyptic movements takes us through the first years of the third millennium 2000 2003 documenting how a radical inability of westerners to understand the medieval mentality that drove global jihad prompted a series of disastrous misinterpretations and misguided reactions that have shaped our so far unhappy century these misinterpretations in 2000 2001 2002 and 2005 contributed fundamentally to the ever worsening moral and empirical disorientations of our information elites journalists academics pundits so while journalists reported palestinian war propaganda as news lethal journalism they were also reporting jihadi war propaganda as news own goal war journalism these radical disorientations have created our current dilemma of pervasive information distrust deep splits within the voting public in most democracies the politicization of science and the inability of western elites to defend their civilization and instead to stand down before an invasion

support for security and justice institutions has become a crucial instrument of international engagement in fragile and conflict affected states in attempts to shore up security as a precondition for sustainable peace international actors have become deeply engaged in reforming the security agencies and security governance institutions of states emerging from conflict but despite their increasing importance in the field of international peace and state building security sector reform ssr interventions remain both highly political and deeply contentious processes expanding on this theme this edited volume identifies new directions in research on the domestic consequences of external support to security sector reform both

empirically and theoretically the focus lies on the so far neglected role of domestic actors interests and political power constellations in recipient states based on a wide range of empirical cases the volume discusses how the often conflictual and asymmetric encounters between external and domestic actors with divergent interests and perceptions affect the consequences of international interventions by taking into account the plurality of state and non state security actors and institutions beyond classical models of weberian statehood the contributions make the case for engaging more closely with the complexity of the domestic security governance configurations that can result from external engagement in the field of security sector reform this book was published as a special issue of international peacekeeping

the israeli palestinian conflict is more than a local or regional dispute its ongoing and escalating nature increases the risk that the violence will spill over its present borders and contribute to both extremism and terrorism while the intifada from 1987 to 1993 was largely a popular uprising and a political struggle the recent clash is a war with a steady escalation between conventional and unconventional forces it is in the interest of all major powers the international community and the united nations to press both sides to accept a realistic peace plan noted middle east expert anthony cordesman details this continuing struggle by explaining the issues at stake for each side the various combatants both directly and indirectly engaged as well as the course of the war in its various incarnations the situation on the ground is complex and the quest for peace is ever more uncertain if the intifada was a struggle for recognition that a peace had to be reached that was just for both sides the israeli palestinian war has polarized both sides away from peace convincing them of the justice of their own cause and tactics and the fundamental injustice of the other side s tactics and goals each side has used human rights international law and civilian casualties as political weapons the history of a near century of conflict is used to justify war rather than a search for peace
