scientific essay from the year 2012 in the subject speech science linguistics grade excellent with honor course critical discourse analysis language english abstract the present paper has shown the practical part of cda according to three scholars namely they are norman fairclough ruth wodak and teun van dijk their approaches are somehow different in method and way of interpretation

while fairclough is brought up on the systemic functional model of theory and thus often concentrates on rather limited amounts of research material wodak turns to sociolinguistics and ethnography with an emphasis on corpus based research and on work with different approaches with a variety of empirical data as well as background information however the notion that language is inherently social remains a key assumption in both approaches on the other hand similarly to fairclough van dijk acknowledges three different perspectives text discourse practice and sociocultural practice and emphasizes on the link between textual analysis and sociocultural analysis however van dijk differentiates himself from both fairclough and wodak in his understanding of social events or of social institutions and power relations to van dijk social cognitions mediate between micro and macro levels of society between discourse and action between the individual and the group therefore the focus on social cognition governs the process of analysis

literacy can empower students but it may also limit their understanding if taught without regard for the context of their lives using his encounters with students in high school college and state prison classrooms as well as his own experience robert yagelski looks at the sometimes ambiguous role of literacy in our lives and examines the mismatch between conventional approaches to teaching literacy and the literacy needs of students in a rapidly changing increasingly technological world he asserts that ultimately the most important job of the english teacher is to reveal to students ways they can participate in the discourse that shapes their lives and he offers a timely look at how technology has influenced the way we write and read the scope of this fascinating book reaches beyond the classroom and offers insight about what it means to be literate in an economically driven dynamic society addressing earlier works on the subject of literacy as well as the ideas of theorists such as foucault this perceptive work has much to offer educators and anyone seeking to understand the nature of literacy itself
