this textbook presents a comprehensive treatment of the legal arrangement of the corporation the instruments and institutions through which capital can be raised the management of the flow of funds through the individual firm and the methods of dividing the risks and returns among the various contributors of funds now in its third edition the book covers a wide range of topics in corporate finance from time series modeling and regression analysis to multi factor risk models and the capital asset pricing model guerard gultekin and saxena build significantly on the first edition of the text but retain the core chapters on cornerstone topics such as mergers and acquisitions regulatory environments bankruptcy and various other foundational concepts of corporate finance new

to the third edition are examinations of apt portfolio selection and time series modeling and forecasting through sas sca and oxmetrics programming factset fundamental data templates this is intended to be a graduate level textbook and could be used as a primary text in upper level mba and financial engineering courses as well as a supplementary text for graduate courses in financial data analysis and financial investments

the capital asset pricing model capm and the mean variance m v rule which are based on classic expected utility theory have been heavily criticized theoretically and empirically the advent of behavioral economics prospect theory and other psychology minded approaches in finance challenges the rational investor model from which capm and m v derive haim levy argues that the tension between the classic financial models and behavioral economics approaches is more apparent than real this book aims to relax the tension between the two paradigms specifically professor levy shows that although behavioral economics contradicts aspects of expected utility theory capm and m v are intact in both expected utility theory and cumulative prospect theory frameworks there is furthermore no evidence to reject capm empirically when ex ante parameters are employed professionals may thus comfortably teach and use capm and behavioral economics or cumulative prospect theory as coexisting paradigms

a substantially updated new edition of the essential text on financial modeling with revised material new data and implementations shown in excel r and python financial modeling has become the gold standard text in its field an essential guide for students researchers and practitioners that provides the computational tools needed for modeling finance fundamentals this fifth edition has been substantially updated but maintains the straightforward hands on approach with an optimal mix of explanation and implementation that made the previous editions so popular using detailed excel spreadsheets it explains basic and advanced models in the areas of corporate finance portfolio management options and bonds this new edition offers revised material on valuation second order and third order greeks for options value at risk var monte carlo methods and implementation in r the examples and implementation use up to date and relevant data parts i to v cover corporate finance topics bond and yield curve models portfolio theory options and derivatives and monte carlo methods and their implementation in finance parts vi and vii treat technical topics with part vi covering excel and r issues and part vii now on the book s auxiliary website covering excel s programming language visual basic for applications vba and python implementations knowledge of technical chapters on vba and r is not necessary for understanding the material in the first five parts the book is suitable for use in advanced finance classes that emphasize the need to combine modeling skills with a deeper knowledge of the underlying financial models

utilizing a multi paradigmatic approach in considering the scientific methodology of mainstream financial economics and suggesting improvements this book identifies eleven biases of the scientific methodology of mainstream financial economics namely intellectual bias local bias fad bias ideological bias automaticity bias confirmation bias cultural bias stereotyping bias under productivity bias homogeneity bias and isolation bias
