this book contains twelve stories of great inventions with a concluding chapter on

famous inventors of today each of the inventions described has added to the comforts and joys of the world each of these inventions has brought about new industries in which many men and women have found employment these stories therefore offer an easy approach to an understanding of the origin of certain parts of our civilization and of the rise of important industries the story of each invention is interwoven with that of the life of its inventor the lives of inventors furnish materials of the highest educative value these materials are not only interesting but they convey their own vivid lessons on how big things are brought about and on the traits of mind and heart which make for success it is hoped that this book will set its readers to thinking how the conveniences of life have been obtained and how progress has been made in the industrial world while appealing to their interest in inventions and in men who accomplish great things may it also bring them into contact with ideas which will grip their hearts fire the imagination and mold their ideals into worthier forms

we live in an incredible world full of incredible inventions and we often can't remember a time before they existed but behind every invention is an inventor and a story in this intriguing volume readers will learn more about inventions from appliances such as microwave ovens to foods such as cornflakes and to things as widespread today as the internet they'll also learn about the people who created these things often on purpose but sometimes by accident

from air conditioners to mri scanners and from bicycles to frozen foods modern life would be unimaginable without the work of inventors unlike other resources on inventions inventors and inventions surprises readers with its wide ranging exploration of inventors of the past and present including the creators of kevlar coca cola ebay and the global positioning system

presents information about eighty four commonly used modern inventions with each entry examining who invented the item how it was invented how it works how it has changed over time and related inventions

in his whistle stop tour of inventions large and small the scientist trevor norton shares the gershwins view that invention is fundamentally comic the sunday times trevor norton who has been compared to gerard durrell and bill bryson weaves an entertaining history with a seductive mix of eureka moments disasters and dirty tricks although inventors were often scientists or engineers many were not samuel morse morse code was a painter lazlow biro ballpoint was a sculptor

and hypnotist and logie baird tv sold boot polish the inventor of the automatic telephone switchboard was an undertaker who believed the operator was diverting his calls to rival morticians so he decided to make all telephone operators redundant inventors are mavericks indifferent to conventional wisdom so critics were dismissive of even their best ideas radio had no future electric light was an idiotic idea and x rays were a hoax even so the state of new jersey moved to ban x ray opera glasses the head of the general post office rejected telephones as unnecessary as there were plenty of small boys to run messages inventomania is a magical place where eccentrics are always in season and their stories are usually unbelievable but rest assured nothing has been invented

there has been just over 2000 years since we started using the ad suffix anno domini and in almost every century something has been created that has made life better or at least different this book is a gentle trawl through some of the most important and often bizarre inventions of mankind a light hearted look at the things that have improved lives for people of the time and often into the future many of us believe that stephenson s rocket signalled the beginning of life of the steam engine in fact a roman invention predated it by over 1600 years read of how the early centuries following the death of christ were dominated by inventions from not only the romans but also the chinese see how far back in time the classic games of chess and backgammon were invented and discover for how long street lighting has been around learn about the inspiring and ultimately tragic story of a war time hero who is responsible for probably the most significant technological change impacting on our current lives and for those of you staring short sightedly through spectacles find out about the origins of these useful accessories read on and enjoy a whistle stop tour through the inventiveness of mankind over the centuries

twelve stories of great inventions grouped under inventions of steam and electric power inventions of manufacture and production and inventions of printing and communication the final chapter introduces the famous inventors of the early twentieth century the story of each invention is interwoven with that of the life of its inventor through these stories the reader learns how big things are brought about and on the traits of mind and heart which make for success suitable for ages 10 to 14

presents information about eighty four commonly used modern inventions with each entry examining who invented the item how it was invented how it works

how it has changed over time and related inventions

famous inventors and the inventions they develop is a fascinating area of historical study that is usually far too advanced for young children however a famous inventors inventions picture book breaks that information down in a way that is interesting and engaging to young boys and girls instead of pages and pages of text that makes no sense to them children can see a picture of the inventor alongside the invention they created this helps to begin laying the foundation for this knowledge in children at a young age and may even spark their interest and imagination in this area

more than fifty of the greatest inventions of all time are described from the wheel and the jib sail to submarines and frozen foods
