the human face is perhaps the most familiar and easily recognized object in the world yet both its three dimensional shape and its two dimensional images are complex and hard to characterize this book develops the vocabulary of ridges and parabolic curves of illumination eigenfaces and elastic warpings for describing the perceptually salient fea

the subject of this book has not been treated comprehensively before for many years i have hesitated to attempt a monographic presentation because i felt uneasy about the idea of delineating something i am not sure about myself and i felt it might be rash to try to integrate what seemed and largely still seems to consist of a heap of tessera not fitting together the conviction won over however that the many details accumulated thus far call for some order now and that an appraisal of where we stand would be appropriate this book i hope can fill a gap barring the way to further progress in the field it is not only a compilation of details but also an attempt to delineate the first outlines of a picture blurry obscure and controversial as it must appear the imagination of the research worker will be aroused i hope and stimulate further progress in addition to data widely dispersed in the literature much unpublished material has been included the limited space available prevented me from giving all the details known the subject is also linked to many neighboring fields of study but these relationships and their ramifications could not be discussed at length this is a minor shortcoming however compared with our great ignorance of the subject in general

the part played by the brazilian tropical timber industry in deforesting the amazon region has not been studied very much this book describes the expansion of the timber industry in the brazilian federal state of para since the 1960s when amazon development became an important item on the government s agenda

this book constitutes the refereed proceedings of the 9th mexican conference on pattern recognition mcpr 2017 held in huatulco mexico in june 2017 the 29 revised full papers presented were carefully reviewed and selected from 55 submissions the papers are organized in topical sections on pattern recognition and artificial intelligence techniques image processing and analysis robotics and remote sensing natural language processing and recognition applications of pattern recognition
