this first book length analysis of amazon's kindle explores the platform's technological bibliographical and social impact on publishing four shades of gray offers the first book length analysis of amazon's kindle and its impact on publishing simon peter rowberry recounts how amazon built the infrastructure for a new generation of digital publications then considers the consequences of having a single company control the direction of the publishing industry exploring the platform from the perspectives of technology texts and uses he shows how the kindle challenges traditional notions of platforms as discrete entities he argues that amazon's influence extends beyond disruptive technology to embed itself in all aspects of the publishing trade yet despite industry pushback he says the kindle has had a positive influence on publishing rowberry documents the first decade of the kindle with case studies of kindle popular highlights an account of the digitization of books published after 1922 and a discussion of how amazon's patent filings reflect a shift in priorities rowberry argues that while it was initially convenient for the book trade to outsource ebook development to amazon doing so has had adverse consequences for publishers in the mid and long term limiting opportunities for developing an inclusive and forward thinking digital platform while it has forced publishers to embrace digital forms the kindle has also empowered some previously marginalized readerships although it is still too early to judge the long term impact of ebooks compared with that of the older technologies of clay tablets the printing press and offset printing the shockwaves of the kindle continue to shape publishing

i have always loved to write but i never thought i would write more than a dozen books difficult times bring out the best in us and that has meant the period of the covid 19 pandemic for many people and in particular for me during that global crisis i have recovered the best part of me and i remembered how much i liked writing i had never published my books although i always wanted to until it only took a few words in my ears to make up my mind and start writing again and why don t you publish your books on amazon it s free that was enough to encourage me and i started some books but it wasn t until march 29 2021 and specifically arrived at june 27 2021 that during that period of retirement i just started writing a little bit of everything and i ended up writing more than a hundred titles all available on amazon for those of you who do not know africa you must understand that in some african countries the most ignorant people that is those people who have never read a single whole book in their lives get up every morning and with the power of violence and the terror of weapons they assault the freedoms and rights of people they do not get up every morning to work and build a better place but to destroy and steal what belongs to the people and that is the problem of corruption then when the corrupt pretend to fight corruption the story becomes even more tenebrous like a fantasy movie script and that is why we the more intelligent ones prefer to write just as a good musician can create a wonderful melody or song from a single note so it is with literature in this way i have been able to develop or rather to perfect my creative and literary capacity being able to produce and publish in only three months more than a hundred books in several languages mainly in spanish english german portuguese italian some in french and in traditional chinese i have enjoyed a lot along the way because i have learned to know myself better my literary technique is very simple i write about whatever comes to my mind in an organized way with the phone the computer and just free my mind my books are mainly series of books on futuristic technology science religion and spirituality but mostly african history and i write one or two

books a day it does not make much sense that the history of africa is written by non africans or the religion of africa or the spirituality of africa is written by europeans and americans i am not saying it is wrong or that it is not up to everyone to write about what they like but at least from now on if you search for books about africa or equatorial guinea on amazon a large percentage of the results will be part of my literary work and in the case of equatorial guinea 95 of the results about books on amazon is my literary work and i have achieved that in just three months my country equatorial guinea has the highest literacy level on the african continent and yet it is a very little known country unfortunately the country is best known for corruption and abuses but there is much more to the country than that the corrupt are not very intelligent for if they were corrupt they simply would not steal but would create wealth abundance and prosperity and that is my great concern with politicians the corrupt and those who are both that is why in my books i talk a lot about corruption and i hope that the thieves learn something instead of spending their lives fabricating stories because neither the people nor the world are fools only the corrupt are fools not everybody wants to be a politician and not everybody likes corruption but where corruption prevails when you are not a thief you are an enemy of thieves because you cannot be friends since you do not think alike the corrupt thinks he has the right over everybody's property and the honest thinks that is stupidity the corrupt has all the money in the world and has never worked a day in his life and the honest works every day to earn his bread and his living so not everyone has the same mental capacity but something very curious happens when mediocrity reigns the danger of the mediocre is that they do not know or believe that different people and personalities also have different levels of intellectuality and it is precisely that capacity that transforms the world and countries from generation to generation and not steal and steal from generation to generation the mediocre only think about the present and filling their accounts abroad the farther away the better but for those of us who see this continent called africa suffer we believe that the world already deserves something different and a continent with countries that stand out for the capacity of their people and not for the power of thieves that is why perhaps i can even consider myself a revolutionary because no one who accepts disorder as a path for the future of a continent that must be free and has to be free deserves to be called african maybe that is why many of those who accumulate money from africa to go far away have two or three or four passports but some of us we are only africans and we have no intention of going anywhere and with the world we only share the pain of seeing africa suffer for so long because nobody wants that anymore but only corrupt alone do not understand it all intelligent people are enemies of corruption i have always spoken and thought this way and i have always expressed myself this way in public and in private before the public media whenever i could and whoever knows me knows what i think of corruption and the feeling between me and the corrupt is mutual i never write about anything that i cannot defend or say face to face and that is called integrity and that is why i am not a politician nor am i interested in politics because it only serves for mediocrity while the real problems are never solved because the mediocre does not even know where to start that is why today to celebrate the satisfaction of seeing the first 1000 downloads in only 27 days of the already 281

books including the various versions and electronic formats soft and hard cover as well as the various languages and that is why i am writing these lines i consider myself a very humble person because humility is something that is carried inside the heart and is transmitted with contact to the outside only by trying knowing or talking to a person you can really know how he she is but spying and falsifying lying and inventing only shows your own ignorance and low level of mental capacity i thank the almost two thousand people mainly from the united states germany mexico spain brazil italy japan india canada united kingdom france netherlands and australia who have downloaded any of my books in the last ninety days and the more than one thousand people who have bought any of my books on amazon just in this month of june 2021 i do not write to offend or hurt anyone s feelings but the truth is always objective and i always try to write with the truth in my country we use the vulgar term no to so so mot to qualify the importance of the facts and their veracity when any honest ecuadorian guinean speaks writes dances sings or feels he does it for his country for better or worse this book is for those who love reading writing and knowing how to live in peace with oneself and with the world that is to be happy happiness is a choice even in the midst of hell it is true that the environment especially if it is a hostile and oppressive environment always tries to create all possible levels of unhappiness so that one somehow gives up but that is precisely what all the inhabitants of the oppressed peoples of the world share the certainty that doing what one likes for the good of the majority is always the greatest expression of freedom and the struggle for justice and peace and not everyone is a politician because politics is a profession that does not interest everyone thank you for reading these lines 27 06 2021 javier clemente engonga
