the book examines the topic of paternal authority as it developed over a long period of time the focus is on the power of fathers as manifested within a complex fabric of legal social economic political and moral aspects in early modern times a father's power was based upon his personal and legal position as the one responsible for the family and the household in the sense of an economic unit as well as on his moral authority over all those who belonged to said household at the same time the father was subject to public control and his legal status was characterized not only by power but also by obligations this status was modelled after the figure of the pater familias as conceived of in roman law a concept that remained relevant up into the nineteenth century though not without changes ultimately the figure of the pater familias came to overlap with the modern era perception of fathers disempowerment the chapters of this book analyse the public responsibility of fathers in the case of an adulterous daughter legal acts of emancipation by which a son could gain independence from his father and various opinions with regard to indulgent fathering paternal authority over married sons and provisions set out in wills this book was originally published as a special issue of the history of the family

originally published in 1983 the origin of this book is to be found in c c harris s changing conceptions of the relation between family and societal form in scase industrial society class cleavage and control in that article harris attempted to relate traditional research on the family to recent developments in historical enquiry and marxist scholarship the aim of the family and industrial society is to explain the character of the contemporary family by placing it in a wider historical and theoretical perspective it is therefore directed at the undergraduate student for whom the sociology of the family as a topic has for too long been relatively unrelated to those contemporary developments in sociological thought and practice which inform other substantive areas of sociological work the late c c harris is perhaps best known for his best

selling introductory text the family an introduction first published in 1969 this new text was not however a straightforward replacement of an earlier book by a more up to date volume far too much had happened in sociology in social studies and in family life itself for a simple updating to make any sense the family was primarily a descriptive introduction and was a presentation albeit critical of an orthodoxy while this new book retains an introductory element based upon the family's earlier chapters the greater part of it is exploratory and assumes a higher level of sophistication and sociological understanding it is also substantially longer dr harris was singularly well qualified to write a volume of this kind not only had he conducted and was conducting empirical research into the family but his wide theoretical interests rendered him uniquely well placed to contribute to the theoretical development of his field few sociologists shared his familiarity with both anthropological and historical work he was thoroughly familiar with the now unfashionable structural functional approach of which he had always been critical but was enthusiastic about the potentialities of contemporary developments the result is a sophisticated text which combines instruction criticism interpretation and exploration in one volume which familiarises the student with the fundamental work of the past too often neglected and explores exciting new developments for the future it also includes the only general discussion of change in the british family since the last edition of fletcher's the family and marriage in britain
