england is a nation of shopkeepers long before napolean disdainfully paraphrased adam smith british commerce had become a motor for economic growth and increased state power this four volume facsimile edition brings together a range of rare seventeenth and eighteenth century documents about the mercantile system

how american colonists laid the foundations of american capitalism with an economy built on credit even before the united states became a country laws prioritizing access to credit set colonial america apart from the rest of the world credit nation examines how the drive to expand credit shaped property laws and legal institutions in the colonial and founding eras of the republic in this major new history of early america claire priest describes how the british parliament departed from the customary ways that english law protected land and inheritance enacting laws for the colonies that privileged creditors by defining land and slaves as commodities available to satisfy debts

colonial governments in turn created local legal institutions that enabled people to further leverage their assets to obtain credit. It shows how loans backed with slaves as property fueled slavery from the colonial era through the civil war and that increased access to credit was key to the explosive growth of capitalism in nineteenth century America. Credit Nation presents a new vision of American economic history, one where credit markets and liquidity were prioritized from the outset, where property rights and slaves became commodities for creditors' claims, and where legal institutions played a critical role in the stamp act crisis and other political episodes of the founding period.

Richard A. Schwarzlose's long-awaited two-volume *The Nation's Newsbrokers* makes a major contribution to the history of journalism in the United States. Schwarzlose traces the development of the Associated Press and the predecessors of United Press International from scattered beginnings in the 1840s to their emergence as a mature national institution in the World War I era. Volume 2 studies the rapid growth of intercity news gathering and distribution after the Civil War, including the deterioration into collusion among newsbrokers and changes in technology and reporting within the context of attempts to monopolize the flow of information.
