the essays in this volume offer a thorough discussion of the relationship between addiction and rationality this book length treatment of the subject includes contributions from philosophers psychiatrists neurobiologists sociologists and economists contrary to the widespread view that addicts are subject to overpowering and compulsive urges the authors in this volume demonstrate that addicts are capable of making choices and responding to incentives at the same time they disagree with gary becker s argument that addiction is the result of rational choice the volume offers an exposition of the neurophysiology of addiction a critical examination of the becker theory of rational addiction an argument for a visceral theory of addiction a discussion of compulsive gambling as a form of addiction several discussions of george ainslie s theory of hyperbolic discounting analyses of social causes and policy implications and an investigation of the problem of relapse

sociocultural issues in psychiatry will enable readers to understand the influence of culture on psychiatric practice utilize advanced techniques to address clinical cultural impasses and recognize their personal cultural influences and biases and how these might impact psychiatric care this book is synchronized with dsm 5 and contains case examples throughout the text with recommendations on how to navigate a variety of clinical situations

this book discusses the association between ecological and social determinants and suicidal behavior suicidal behavior is an extremely complex human behavior it is an outcome of complex interactions among multiple factors like gene and environment biopsychosocial proximal and distal factors several risk factors such as psychiatric disorders life events social deprivation personality traits and disorders and substance abuse have been identified even though those vary based on culture time country and methods of assessment in recent times evidence has shown associations among ecological variables like the human development index the income of the country the gini index educational attainment the green environment climate change and suicidal behavior at the same time there are interlinked confounding variables that challenge the findings given the lack of literature discussing these findings this book seeks to compare and contrast the ecological aspects and suicidal behavior holistically
