first published in 1993 the scientific and political debate about poverty has been changing fast with dramatic implications for intellectual interpretation and action by governments and the intention in

publishing this volume is to contribute to that debate scientists concerned to analyse poverty have been thrust by events into greater international service but there are sinister forces at work which are seeking to divert them into petty issues to blame the victims of poverty or to cut them off from the resources or opportunities to investigate and report freely this book is born of that frustration and represents the changing debate during the late 1980s and early 1990s

this detailed book is a resource for students practitioners and leaders interested in how the major world religions have understood poverty and responded to the poor poverty is a universal phenomenon across history regardless of country or culture today the demographics of the poor are on the rise globally it is a critical issue religious traditions are another universal aspect of human societies and nearly all religions include directives on how to respond to the poor and systemic poverty how do the various religious traditions conceptualize poverty and what do they view as the proper response to the poor poverty and the poor in the world s religious traditions religious responses to the problem of poverty brings together specialists on the religions of the world and their diverse viewpoints to identify how different religious traditions interact with poverty and being poor it also contains excerpts of religious texts that readers can use as primary documents to illustrate themes such as identifying the poor religious reasons for being poor and responses like charity and development to the existence of poverty this book serves as a powerful resource for students of subjects like international development missiology comparative religion theology social ethics economics and organizational leadership as well as for any socially concerned clergy of various faiths

the debate on persisting poverty in the united states somewhat dampened for the past decade has now been fully rekindled devine and wright have entered that debate with an analysis that is both quantitative and qualitative informed on the one side by urban ethnography and steeped in official statistics and relevant data on the other the result is an incisive and cogently documented narrative account leading to policy recommendations for a new president and a new era in the greatest of evils devine and wright develop three principal themes first they argue that poverty is by no means monolithic each subgroup within the population in poverty tends to have different problems secondly the so called underclass within the poverty population represents a new and especially corrosive development one that cannot be analyzed in traditional terms nor dealt with in traditions ways thirdly the war on poverty of the sixties was not the unmitigated disaster that so many have come to believe and offered a boldness of vision that today

s poverty policies tend to lack in exploring these themes the authors show how the social and economic costs of poverty related problems exceed what it will cost to find remedies that address the underlying causes of residual poverty

the development co operation report is the key annual reference document for statistics and analysis on trends in international aid

it s one thing to say that we believe in justice for all but quite another to actively seek social justice for the poor in our midst after extensive research the author is convinced that a huge gap exists between talking about justice and actually doing justice for the poor she believes that achieving justice for all requires a

deep and broad approach that involves the integration of catholic social teaching with scripture and tradition so that charity and justice actually become social justice only when people every race nationality class and religion are educated for justice built on respect for the person and the responsibility of individuals and the community will we in the u s be able to cut through the rhetoric of blame and move toward solidarity

this book demonstrates how the various legal efforts employed to eradicate global urban poverty also play a significant role in shaping it urban poverty has been widely examined as a social problem that requires attention and social commitment law is often seen as both an important contributor to the problem as well as a source of crucial tools to overcome it in spite of this however poverty is surprisingly disregarded within legal scholarship this book counters this by drawing on legal theory legal history and legal geography to inquire how urban poverty is made visible and invisible as a problem across global cities more specifically it investigates the mechanisms and networks through which global urban poverty has been conceptually and materially shaped in a way that fits the remit of global corporate philanthropy and the development aid agenda by following law s circuitous interactions with poverty knowledge and antipoverty interventions the book demonstrates how it plays a historical role in making poverty seen known and remedied as a result the book argues law consolidates a stable image of poverty as an essential problem to be uniformly found worldwide and so reasonably fixable with the appropriate legal reforms taking poverty to be a fundamental manifestation of social injustice the book thus raises key questions about the role of law in the achievement of social justice this innovative and insightful account of the relationship between law and poverty will appeal to scholars in critical and socio legal studies as well as others working in poverty studies urban studies development studies geography sociology and social policy
