the experience of democratic self government of migration practiced in the village of riace calabria is an important case study for the potential development of migration in relation to three aspects of last italian government s policies all of which have both european and international relevance the failure to sign the global compact for safe orderly and regular migration the securitarian management of the migration crisis and distorted media narratives around migration this book derives from the collective efforts of a group of young social scientists in the fields of politics law economic geography and media analysis all of whom have past and present practical experience in the field the book focuses on the high impact local policies implemented in the small calabrian village which turned out to possess one of the best vantage points for examining human migration on a global level the volume represents an attempt to speak to a broad public in order to challenge common sense and easy narratives on the complex issue of migration

the present volume grew out of a double session of the boston collo quium for the philosophy of science held in boston on march 25 1983 the papers presented there by biezunski glick goldberg and judith goodstein offered both sufficient comparability to establish regulari ties in the reception of relativity and einstein s impact in france spain the united states and italy and sufficient contrast to suggest the salience of national inflections in the process the interaction among the participants and the added perspectives offered by members of the audience suggested the interest of commissioning articles for a more inclusive volume which would cover as many national cases as we could muster only general guidelines were given to the authors to treat the special or general theories or both hopefully in a multidisciplinary setting to examine the popular reception of relativity or einstein s personal impact or to survey all these topics in a previous volume on the 2 comparative reception of darwinism one of us devised a detailed set of guidelines which in general were not followed in our opinion the studies in this collection offer greater comparability no doubt because relativity by its nature and its complexity offers a sharper more easily bounded target as in the darwinism volume this book concludes with an essay intended to draw together in comparative perspective some of many themes addressed by the participants

a century after his birth this volume presents a re assessment of the life and work of piero sraffa one of the great economists of the twentieth century from his anti marshallian articles of 1925 and 1926 to his classic work on the theory of capital production of commodities by means of commodities sraffa s contribution to the study of economics is closely examined

aldo belleni morante started to write this book in february 2008 giving two provisional titles semigroups and evaluation equations in locally convex spaces an introduction or applied semigroups in locally convex spaces and he seemed on hurry for finishing it he decided to share his scientific viewpoint with the scottish colleagues prof adam c mcbride amb and dr wilson lamb wl from the strathclyde university he fully desired this collaboration as a consequence of some previous scientific works undertaken since 2006 at the strathclyde university along his appointment as permanent visiting professor he also considered the very early conception of this book since 2005 when he spent his latest sabbatical year in glasgow and further in 2007 when adam mcbride came to florence to work on this but not much work was done at that time to this end aldo started happily on his own research work to write the book and he completed his first part in 2008 unfortunately the first health problems arisen and this book stayed unfinished

in this important volume major events and personalities of 20th century physics are portrayed through recollections and historiographical works of one of the most prominent figures of european science a former student of enrico fermi and a leading personality of physical research and science policy in postwar italy edoardo amaldi devoted part of his career to documenting both as witness and as historian some significant moments of 20th century science the focus of the book is on the european scene ranging from nuclear research in rome in the 1930s to particle physics at cern and includes biographies of physicists such as etторе majorana bruno touschek and fritz houtermans edoardo amaldi carpaneto 1908 roma 1989 was one of the leading figures in twentieth century italian science he was conferred his degree in physics at rome university in 1929 and played an active role as a member of the team of young physicists known as the boys of via panisperna in the fundamental research on artificial induced radioactivity and the properties of neutrons which won the group s leader enrico fermi the nobel prize for physics in 1938 following fermi s departure for the united states in 1938 and the disruption of the original group amaldi took upon himself the task of reorganising the research in physics in the difficult situation of post war italy his own research went from

nuclear physics to cosmic ray physics elementary particles and in later years gravitational waves active research was for him always coupled to a direct involvement as a statesman of science and an organiser he was the leading figure in the establishment of infn national institute for nuclear physics and has played a major role as spokesman of the italian scientific community in the creation of cern the large european laboratory for high energy physics he also actively supported the formation of a similar trans national joint venture in space science which gave birth to the european space agency in these and several other scientific organisations he was often entrusted with directive responsibilities in his later years he developed a keen interest in the history of his discipline this gave rise to a rich production of historiographic material of which a significant sample is collected in this volume
