the images on the cover call attention to the relationship between macro observations and the intimate structure of chemical substances and the changes both chemical and physical that they undergo fireworks one of the ingredients is phosphorus a

molecular form of which is believed to consist of linked tetrahedra of phosphorus atoms the chemical reaction of phosphorus with oxygen is partly responsible for the spectacular show of light carbon the element is found in several forms including the familiar diamond and another recently discovered sooty substance that consists of soccer ball shaped molecules often referred to as buckeyballs diamond is not the most stable form of carbon and is created from other forms of carbon at high temperatures and pressures deep within the earth acetylene torch cutting steel is possible because of the intense heat generated by the chemical reaction of acetylene with oxygen a reaction between molecules of C_2H_2 and O_2 to give CO_2 and H_2O hot air balloon the air that helps it rise is heated by the combustion of molecules of propane each composed of three carbon and eight hydrogen atoms stormy weather the evaporation of water serves to store energy provided by the sun subsequent condensation of the water vapor releases this energy and is the basis of all the weather systems on our planet

since the publication of my book mathematical statistics shao 2003 i have been asked many times for a solution manual to the exercises in my book without doubt exercises form an important part of a textbook on mathematical statistics not only in training students for their research ability in mathematical statistics but also in presenting many additional results as complementary material to the main text written solutions to these exercises are important for students who initially do not have the skills in solving these exercises completely and are very helpful for instructors of a mathematical statistics course whether or not my book mathematical statistics is used as the textbook in providing answers to students as well as finding additional examples to the main text motivated by this and encouraged by some of my colleagues and Springer Verlag editor John Kimmel i have completed this book mathematical statistics exercises and solutions this book consists of solutions to 400 exercises over 95 of which are in my book mathematical statistics many of them are standard exercises that also appear in other textbooks listed in the references it is only a partial solution manual to mathematical statistics which contains over 900 exercises
