here is a bold history of economics the dramatic story of how the great

economic thinkers built today's rigorous social science noted financial writer and economist Mark Skousen has revised and updated this popular work to provide more material on Adam Smith and Karl Marx and expanded coverage of Joseph Stiglitz, imperfect markets, and behavioral economics. This comprehensive yet accessible introduction to the major economic philosophers of the past 225 years begins with Adam Smith and continues through the present day. The text examines the contributions made by each individual to our understanding of the role of the economist, the science of economics, and economic theory to make the work more engaging. Boxes in each chapter highlight little-known and often amusing facts about the economists' personal lives that affected their work.

America's post-World War II prosperity created a boom in higher education, expanding the number of university-educated readers and making a new literary politics possible. Writers began to direct their work toward the growing professional class, and the American public in turn became more open to literary culture. This relationship imbued fiction with a new social and cultural import, allowing authors to envision themselves as unique cultural educators. It also changed the nature of literary representation; writers came to depict social reality as a tissue of ideas produced by knowledge elites, linking literary and historical trends. Stephen Schryer underscores the exalted fantasies that arose from postwar American writers' new sense of their cultural mission, hoping to transform capitalism from within. Writers and critics tried to cultivate aesthetically attuned professionals who could disrupt the narrow materialism of the bourgeoisie. Reading Don DeLillo, Marge Piercy, Mary McCarthy, Saul Bellow, Ursula K. Le Guin, Ralph Ellison, and Lionel Trilling, among others, Schryer unravels the postwar idea of American literature as a vehicle for instruction while highlighting both the promise and flaws inherent in this vision.

Jean-Luc Marion is one of the world's foremost philosophers of religion as well as one of the leading Catholic thinkers of modern times. In *God Without Being*, Marion challenges a fundamental premise of traditional philosophy, theology, and metaphysics: that God, before all else, must be taking a characteristically postmodern stance and engaging in passionate dialogue with Heidegger. He locates a God without being in the realm of *agape* or Christian charity and love. If God is love, Marion contends, then God loves before he actually is. First translated into English in 1991, *God Without Being* continues to be a key book for discussions of the nature of God. This second edition contains a new preface by Marion as well as his 2003 essay on Thomas Aquinas, offering a controversial contemporary perspective. *God Without Being* will remain essential reading for scholars and students of philosophy and religion, daring and profound in matters most central to his thesis. Marion's control is admirable, and his attunement to the nuances of other major postmodern thinkers is impressive. *Theological Studies*: a truly remarkable work. *First Things*: very rewarding reading. *Religious Studies Review*.

Merleau-Ponty has long been known as one of the most important philosophers of aesthetics, yet most discussions of his aesthetics focus on visual art. This book corrects that balance by turning to Merleau-Ponty's extensive engagement with literature. From Proust, Merleau-Ponty developed his conception of sensible ideas from Claudel. His conjoining of birth and knowledge as *co-naissance* from Valéry, *Came Implex*, or *The Animal of Words*, and the chiasma of two destinies, literature also provokes the questions of expression, metaphor, and truth, and the meaning of a Merleau-Pontian poetics. The poetic of Merleau-Ponty is the book argues a poetic of the flesh, a poetic of mystery, and a poetic of the visible in its relation to the invisible, ultimately theoretical figures or figuratives that appear at the threshold.
