South Africa's history stretches back to the beginnings of human existence. This book provides an overview to South Africa's multiple millennia of history covering its long and often troubled past to its current status in the 21st century. A newly revised and thoroughly updated version of a popular Greenwood publication, the history of South Africa, Second Edition, provides readers with readable, accessible information on the nation's prehistory, early history, and colonial past. Its unfortunate apartheid era, as well as new coverage of South Africa's more recent events in the 20th and 21st centuries, is presented. This work presents unique, extended coverage of South Africa's prehistory beginning 3.5 million years ago and incorporating information gleaned from the most recent archaeological finds. The text reflects the most current historiography on African settlement and life before the arrival of Europeans, accurately describes the colonial era as a period of European hegemony and intense African resistance, and discusses in great detail the apartheid years and the events leading up to majority rule in 1994. This second edition also includes an updated timeline, new biographical sketches of notable people, and supplies recent print and electronic resources in the bibliography.

In 1969, the Swedish Parliament endorsed a policy of direct assistance to the liberation movements in Southern Africa. Sweden thus became the first Western country to enter into a relationship with organizations that elsewhere in the West were shunned as communist or terrorist. This book, the first in a two-volume study on Sweden, the regional struggles for majority rule, national independence, traces the background to the relationship, presenting the actors, factors behind the support to MPLA of Angola, Frelimo of Mozambique, SWAPO of Namibia, ZANU ZAPU of Zimbabwe, and ANC of South Africa. It addresses the question why Sweden established close relations with the very movements that eventually would assume state power in their respective countries. The second volume, later this year, will discuss how the support was expressed, covering the period from 1970 until the democratic elections in South Africa in 1994.

First published in 1994, this volume includes an examination of the regional dynamics of Namibia's decolonization since early 1985 and the author's interest in Southwestern Africa since he witnessed the South African invasion of Angola in 1975-76 as a delegate of the International Committee of the Red Cross. The research was undertaken as part of a post-doctoral project supported by the Swiss National Science Foundation. It also includes extensive research in the region, notably in the frontline states.

This book analyzes the phenomenon of xenophobia across African countries with its roots in colonialism, which coercively created modern states through border delineation and the artificial merging and dividing of communities. Xenophobia continues to be a barrier to post-colonial sustainable peace and security and socio-economic and political development in Africa. This volume critically assesses how xenophobia has impacted the three elements of political economy: state, economy, and society. Beginning with historical and theoretical analysis to put xenophobia in context, the book moves on to country-specific case studies, discussing the nature of xenophobia in Nigeria, South Africa, Zambia, Ghana, and Zimbabwe. The chapters furthermore explore both violent and non-violent manifestations of xenophobia and analyze how state responses to xenophobia affect African states' economies and societies, especially in those cases where xenophobia has widespread institutional support. Providing a theoretical understanding of xenophobia and proffering sustainable solutions to the proliferation of xenophobia in the continent, this book is of use to researchers and students interested in political science, African politics, peace studies, security, and development, economics, as well as policy makers working to

eradicate xenophobia in africa
