most major economies use a value added tax vat which is a derivation of the french 1954 *taxe sur la valeur ajoutée* the initial imposition of vat in france and its spread around the world have been driven by economic reasons this book focuses on one of these economic triggers the neutrality of vat as regards the functioning of the economy it demonstrates that the reason vat was chosen in france and why thereafter it spread around the world was because it offered the possibility to collect governmental revenue while allowing the economic forces of the market to interplay without being adversely affected the prerequisite conditions for the existence of vat neutrality are therefore identified herein along with an overview of the vat mechanism demonstrating that the concept of neutrality is built into the vat system in a manner that allows for the preservation of the natural functioning of the market after the definition of vat neutrality is set forth the elements that comprise vat neutrality are tested against the realities on the ground and the issues that infringe the neutrality of vat are identified and analysed in conclusion remedies for these issues are being sought by a review of the causes of infringement of vat neutrality in the perspective of selected proposals for modified vat systems these proposals include redesignating the place where vat is levied and improving vat collection ultimately the proposed solution has recourse to the roots of vat together with the most advanced technological tools available to give back to vat the power to levy revenue while letting the economic forces of the market interplay without instigating any adverse influence

the book presents a comprehensive treatment of unemployment and economic problems in jammu kashmir kashmir being a conflict ridden zone has far less opportunities for employment than rest of the other states with an underdeveloped industrial sector and the inability of government to create enough jobs there seems to be no immediate solution lack of avenues to engage the youth in meaningful ways result in making miscreants out of many of them young populations across the world are generally seen as drivers of socio economic growth but in kashmir the youth bulge is a problem unemployed youths destabilize the economy by being used to create mayhem by the anti social elements in the region underdevelopment and unemployment in jammu kashmir is the manifestation of a mismatch between physical and human resources this exists when a large segment of the working age population does not possess the appropriate skills and knowledge to be gainfully employed in addition lackadaisical and imprudent policies pursued by subsequent governments are the major challenge a radical shift in its policies especially in the education sector is an absolute prerequisite for the birth of a capable workforce the remedy lies in revamping the education sector by crafting appropriate policies for suitable skills in line with the socio economic requirements of the

society the book argues the government must think about a long term plan for unemployed youth and devise a policy to channel the youth bulge constructively

providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations this book addresses the missing link between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR mindset when developing sustainable business strategies. The book consists of three parts: 1 a theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable CSR approach 2 a practical realm which addresses putting CSR and sustainability into business practice 3 an educational realm which proposes how to incorporate the concepts into teaching and training.

multiple green transformations are required if humanity is to live sustainably on planet earth. Recalling past transformations this book examines what makes the current challenge different and especially urgent. It examines how green transformations must take place in the context of the particular moments of capitalist development and in relation to particular alliances. The role of the state is emphasised both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations. The book also highlights the role of citizens as innovators entrepreneurs green consumers and members of social movements. Green transformations must be both top down involving elite alliances between states and business but also bottom up pushed by grassroots innovators and entrepreneurs and part of wider mobilisations among civil society. The

chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability written by experts in the field this book will be of great interest to researchers and students in environmental studies international relations political science development studies geography and anthropology as well as policymakers and practitioners concerned with sustainability
