one of the most thoroughly researched accounts of the thimerosal controversy thus far the book for medical professionals and concerned parents to read publishers weekly starred review reported autism cases among american children have risen from about 1 in 10 000 in 1987 to a shocking 1 in 166 today this trend coincided with the addition of several new shots to the nation s vaccination schedule most of these shots contained a preservative called thimerosal which includes a quantity of the toxin mercury evidence of harm explores the controversy over what many have called an epidemic of afflicted children following several families david kirby traces their struggle to understand how and why their once healthy kids rapidly descended into silence or disturbed behavior often accompanied by severe physical illness these families sought answers from their doctors from science from pharmaceutical companies that manufacture vaccines and finally from the center for disease control and the food and drug administration to no avail but as they dug deeper the families also found powerful allies in congress and in the small community of

physicians and researchers who believe that the rise of autism and other disorders is linked to toxic levels of mercury that accumulate in the systems of some children from closed meetings of the fda cdc and drug companies to open hearings held by congress this book shows a medical establishment determined to deny evidence of harm as research demonstrates the questions raised have significant implications for all children and for those entrusted to oversee our national health a thoroughly researched well written and important book bernard rimland director of the autism research institute and founder of the autism society of america

since antiquity mercy has been regarded as a virtue the power of monarchs was legitimated by their acts of clemency their mercy demonstrating their divine nature yet by the end of the eighteenth century mercy had become an injustice committed against society a manifest vice mercy was exiled from political life how did this happen in this book malcolm bull analyses and challenges the enlightenment s rejection of mercy a society operating on principles of rational self interest had no place for something so arbitrary and contingent and having been excluded from hobbes s theory of the state and hume s theory of justice mercy disappeared from the lexicon of political theory but bull argues these idealised conceptions have proved too limiting political realism demands recognition of the foundational role of mercy in society if we are vulnerable to harm from others we are in need of their mercy by restoring the primacy of mercy over justice we may constrain the powerful and release the agency of the powerless and if arguments for capitalism are arguments against mercy might the case for mercy challenge the very basis of our thinking about society and the state an important contribution to contemporary political philosophy from an inventive thinker on mercy makes a persuasive case for returning this neglected virtue to the heart of political thought

mercury in seafood unravels the complexities of mercury contamination in our food supply focusing on the health risks associated with fish consumption it highlights how industrial pollution and natural processes lead to mercury accumulation in aquatic ecosystems transforming into methylmercury which concentrates in larger

fish understanding this process is crucial as mercury exposure can lead to neurological and developmental issues emphasizing the need for informed dietary choices the book uniquely balances the nutritional benefits of seafood such as omega 3 fatty acids against the potential dangers of mercury poisoning the book begins by explaining the fundamentals of mercury chemistry and its journey through the environment it then moves into the science of bioaccumulation illustrating how mercury levels increase up the food chain subsequent chapters explore the health effects of methylmercury exposure supported by research and provide a guide to safer seafood selections by presenting scientific data in an accessible way mercury in seafood empowers readers to make informed decisions understand government advisories and appreciate the role of sustainable fishing

how does mercury get out of the ground and into our food is tuna safe to eat what was the minamata disaster mercury pollution a transdisciplinary treatment addresses these questions and more the editors weave interdisciplinary threads into a tapestry that presents a more complete picture of the effects of mercury pollution and provides new way

the stunning history of autism as it has been discovered and felt by parents children and doctors nearly seventy five years ago donald triplett of forest mississippi became the first child diagnosed with autism in a different key tells the extraordinary story of the world his diagnosis created a riveting human drama that takes us across continents and through some of the great social movements of the twentieth century the history of autism is above all the story of families fighting for a place in the world for their children it is the story of women like ruth sullivan who rebelled against a medical establishment that blamed refrigerator mothers for causing autism of fathers who pushed scientists to dig harder for treatments of parents who forced schools to accept their children but many others played starring roles too doctors like leo kanner who pioneered our understanding of autism scientists who sparred over how to treat autism and those with autism like temple grandin and ari ne eman who explained their inner worlds and championed a

philosophy of neurodiversity this is also a story of fierce controversy from the question of whether there is truly an autism epidemic and whether vaccines played a part in it to scandals involving facilitated communication one of many treatments that have proved to be blind alleys and there are dark turns too we learn about experimenters feeding lsd to children with autism or shocking them with electricity to change their behavior and the authors reveal for the first time that hans asperger discoverer of the syndrome named after him may have cooperated with the nazis in sending disabled children to their deaths by turns intimate and panoramic in a different key takes us on a journey from an era when families were shamed and children were condemned to institutions to one in which parents and people with autism push not simply for inclusion but for a new understanding of autism as difference rather than disability

jabbed demonstrates that the medical procedure hailed as the greatest medical advancement in history vaccines is a racket run by criminals and gullible believers who have replaced vaccine science with the religion of vaccinology vaccine marketers teach believers to fear shame and scapegoat anyone foolish enough to question the sanctity of vaccines such an environment is not the domain of science rather it s the breeding ground of tyranny jabbed exposes this tyranny from polio and smallpox to medical journals medical curricula congressional hearings regulatory policies white house statements and executive orders jabbed shines light on the dark underbelly of big pharma big medicine and big government a vaccine informed public is the only thing that will have the power to stop vaccine industry sociopaths and to hold them accountable for their crimes jabbed informs and immunizes against three of the most dangerous epidemics in history tyranny greed and corruption once immunized the growing vaccine informed community will have the power to stand up and dismantle the vaccine paradigm and program and to punish the perpetrators of what may well be the greatest medical fraud ever perpetrated on the human race vaccines

i received my bachelor of science degree in analytical chemistry from wayne state

university in detroit michigan my first full time employment after graduation was with federal food and drug administration the duties consisted of analyzing food and drugs that was being sold in the united states it also included in analyzing food products imported from foreign nations for any pest contamination the food products from large food producing manufacturers were also analyzed for pest contamination and content the drugs were analyzed for amount specified on labels there were numerous fda laboratory districts established nationwide the detroit district employed about forty analytical chemists and about forty to fifty inspectors our district director emphasized on us the importance of our work two of the important items mentioned to our occasional gathering emphasized the importance of fda work one was the advent of sulfa drugs prior to antibiotics that were widely used and they were highly not soluble someone at one of the manufacturing outfits figured out a way of dissolving the sulfa drugs in ethylene glycol car cooling system liquid highly poisonous this elixir was used on a ten year old boy who died due to the poison the other item he mentioned was an inspector at a tuna canning manufacturer observed how some decomposed sections of the fish were slowly incorporated into the final canned product it is a shame that these highly guarded human health districts have been closed this is why this book came about

most parents would never consider dispensing deadly addictive street drugs to their children but if a trusted physician writes a prescription for an fda approved schedule 2 medication for their two year old based on some questionable mental health screening those unwary parents do not question or object despite side effect warnings regularly revealed during tv ads parents frequently fail to take those warnings seriously perhaps presuming that the side effects are happenstance or rarely occur over the decades because organized psychiatry represented by the american psychiatric association apa convened numerous consensus panels that designed hundreds of non biologically based disorders for its diagnostic and statistical manual of mental disorders dsm especially suitable for the pill for every ill pharmaceutical industry that conceivably already had many profitable solutions for the disorders in the pre production process the consequences have been disastrous

with no discernable end in sight some people taking prescription drugs or withdrawing from them have perpetrated school mall and public shootings that is in addition to thousands of suicides that the public never hears about unless the victim is a well known public figure like robin williams just the military related suicide rate is 8 000 per year untold numbers of these are the result of the psych drug cocktails doled out by psychiatrists working for the va the government is big pharma's largest customer in addition to the homicides and suicides irreversible brain damage results from drug remedies to temporary problems that might have been easily resolved through compassionate interaction and talk therapy despite the claims that drugs were not a factor in the sandy hook mass murders certain circumstances provide a different picture adam lanza always a unique individual changed from being a geeky weird kid to being a mass murderer not of people his own age but of beautiful vulnerable children feeling secure in their classrooms in a sleepy bedroom community in connecticut

how does pollution impact our daily quality of life what are the effects of pollution on children's development why do industry and environmental experts disagree about what levels of pollutants are safe in this clearly written book moore traces the debates around five key pollutants lead mercury noise pesticides and dioxins and pcbs and provides an overview of the history of each pollutant basic research findings and the scientific and regulatory controversies surrounding it moore focuses in particular on the impact of these pollutants on children's psychological development their intellectual functioning behavior and emotional states only by understanding the impact of pollution can we prevent future negative effects on quality of life and even pollution disasters from occurring this volume will be of great interest to parents child health care experts public health officials regulators and health and environmental advocates

traces the debates around six key pollutants lead mercury noise pesticides ionizing radiation and dioxins and pcb's provides an overview of the history of each pollutant research findings and the scientific and regulatory controversies
