financial risk management is a topic of primary importance in financial markets it is important to learn how to measure and control risk how to be primed for the opportunity of compensative return and how to avoid useless exposure

existing investment models fail to correctly assess the efficiency of investments this happens due to both the lack of self consistent models based on first principles

and the inability to correctly assess the discount rate this book describes innovative investment models tested in practice the authors modify these models for real implementation conditions including frequent payments of income tax and interest on debt at the end of periods and as advance payments and variable payments the book examines how these types of payments influence the efficiency of investment projects it considers the efficiency of an investment project from two perspectives the owners of equity and debt and only the equity the latest versions of two main theories of capital structure brusov filatova orekhova bfo and modigliani miller mm allow for the correct assessment of the discount rate when evaluating the efficiency of investment projects both long term and of arbitrary duration the book also describes the practical application of the created investment models and develops a new methodology for rating investment projects

this edited volume with contributions by area experts offers discussions on a range of evolving topics in economics and social development at center are important issues central to sustainable development economic growth technological change the economics of climate change commodity markets long wave theory non linear dynamic models and boom bust cycles this is an excellent reference for academic and professional economists interested in emerging areas of empirical macroeconomics and finance for policy makers and curious readers alike it is also an outstanding introduction to the economic thinking of those who seek a holistic and all encompassing approach in economic theory and policy looking into new data and methodology this book offers fresh approaches in a post crisis environment set in a profound understanding of the diverse currents within the many traditions of economic thought this book pushes the established frontiers of economic thinking it is dedicated to a leading scholar in the areas covered in this book willi semmler

this course of lectures introduces students to elementary concepts of corporate finance using a more systematic approach than is generally found in other textbooks axioms are first highlighted and the implications of these important concepts are studied afterwards these implications are used to answer questions about corporate finance including issues related to derivatives pricing state price probabilities dynamic hedging dividends capital structure decisions and risk and incentive management numerical examples are provided and the mathematics is kept simple throughout in this second edition explanations have been improved based on the authors experience teaching the material especially concerning the scope of state price probabilities in chapter 12 there is also a new chapter 22 fourteen insights a

the original theory of capital cost and capital structure put forward by nobel prize winners modigliani and miller has since been modified by many authors and this book discusses some of them the book s authors have created general theory of capital cost and capital structure the brusov filatova orekhova bfo theory which generalizes the modigliani miller theory to encompass companies of an arbitrary age and arbitrary lifetime despite the availability of this more general theory the classical modigliani miller theory is still widely used in practice in this book the authors for the first time generalize it for cases of practical relevance for the case of variable profit for the case of advance tax on profit payments and interest on debt payments for the case of several tax on profit and interest on debt payments per period and for the combination of all three effects these generalizations lead to valuable theoretical results as well as significantly widen of practical application this

theory in practice and increase of the quality of finance management of the company as well the book investigates the applications of said results in corporate finance investments taxation and ratings where employing a generalized modigliani miller theory can be very fruitful

most existing texts covering topics in islamic finance discuss the potential of islamic banking very few talk about other forms of financing and the investment activities of islamic firms from the standpoint of owners and managers this book fills this gap by looking at the traditional as well as non traditional financing and investment activities of shariah compliant companies the chapters in this edited text offer a full range of topics on corporate finance for islamic firms including global comparisons of shariah screening dividend policy and capital structure of islamic firms details of global islamic equity markets trends and performance of sukuk markets and a brief account of derivative securities that can be used in islamic finance this is a useful reference for anyone who wishes to learn more about the performance of shariah compliant companies vis à vis conventional firms the book includes both technical and non technical information that would be suitable for classroom teaching as well as a reference for postgraduate research students
