despite the advances in educational effectiveness theory and methodology in the last 20 years important questions and issues remain unresolved in particular existing theoretical frameworks of educational effectiveness are only able to

describe the interrelationship among factors at the system school classroom and student levels and their cross level interdependency in a very general manner additionally although a large number of studies provide empirical evidence of the impact of single factors and factor constellations on student learning the embedding of the empirically identified results in theoretical models of educational effectiveness has to be carried out more systematically in order to develop more elaborated theories of educational effectiveness the aim of this book is to contribute to the advancement of educational effectiveness theory by discussing different strategies including alternative theoretical models to understand educational in effectiveness extending the methodology to analyze processes and mechanisms of educational in effectiveness analyzing differential effects of processes and instruments on educational in effectiveness carrying out complex multivariate analyses considering manifest and latent variables and combining theory and practice in real school situations taken together the strategies presented in this book make it clear that the advancement of educational effectiveness theory depends on the advancement of educational effectiveness methodology or in other words from theory to methodology and from empirical evidence back to theory this book was originally published as a special issue of school effectiveness and school improvement

achievement tests play an important role in modern societies they are used to evaluate schools to assign students to tracks within schools and to identify weaknesses in student knowledge the ged is an achievement test used to grant the status of high school graduate to anyone who passes it ged recipients currently account for 12 percent of all high school credentials issued each year in the united states but do achievement tests predict success in life the myth of achievement tests shows that achievement tests like the ged fail to measure important life skills james j heckman john eric humphries tim kautz and a group of scholars offer an in depth exploration of how the ged came to be used throughout the united states and why our reliance on it is dangerous drawing on decades of research the authors show that while ged recipients score as well on achievement tests as high school graduates who do not enroll in college high school graduates vastly outperform ged recipients in terms of their earnings employment opportunities educational attainment and health the authors show that the differences in success between ged recipients and high school graduates are driven by character skills achievement tests like the ged do not adequately capture character skills like conscientiousness perseverance sociability and curiosity these skills are important in predicting a variety of life outcomes they can be measured and they can be taught using the ged as a case study the authors explore what achievement tests miss and show the dangers of an educational system based on them they call for a return to an emphasis on character in our schools our systems of accountability and our
