the glass cliff is a conversation about what happens when women break the rules and break through the glass ceiling every current and aspiring leader needs to read this book helen tupper sarah ellis authors of the squiggly career and you coach you clever brilliantly researched and vitally important dawn o porter bestselling author of the cows and cat lady have you ever wondered why there are so few success stories of women in business leadership or maybe you ve wondered what life is really like

on the other side of the glass ceiling the world of work is supposedly changing embracing diversity yet are the opportunities we're giving to women really equal to those of men drawing on almost twenty years of research from around the world the glass cliff phenomenon whereby women are often only hired in leadership roles when a business is already underperforming meaning their chances of success are limited before they even start in the role is well established but little known until now this is the story of the glass cliff a story of a structural inequality disguising itself as the personal failures of women when sophie williams gave her viral ted talk on the subject she was subsequently flooded with accounts of confident accomplished women who had taken what seemed like a dream leadership role only to quickly find themselves in a waking nightmare without the language to describe their experiences they had been left blaming themselves but learning about the glass cliff enabled them to reframe and reexamine what they'd gone through once we understand the glass cliff once we can stand together and face it head first we can start to unravel so many other false narratives about women's leadership experiences that just don't make sense without it by understanding the phenomenon and by telling one another about it we can affect the conversation empower one another to overcome societal bias and ultimately change the world of work for women forever

this book 100 statements of truth that real life squeezed out of me is basically a mini biography or window into my life it s long been a pet peeve of mind that wisdom and proverbs should only come from the dead as in ancient text for to me there s still plenty of wisdom and proverbs available to be constricted to paper or the written word today should people just be keen honest and insightful unto own life and events around them the 100 statements are listed in chronological order by year month day and even time thoughts were written down this book is basically a snapshot into my real life diary and there s much more to follow should this book here succeed or even modestly succeed for the lessons we learn in life never stop until we re gone

the considerable interest in graphene and 2d materials is sparking intense research on layered materials due to their unexpected physical electronic chemical and optical properties this book will provide a comprehensive overview of the recent and state of the art research progress on layered materials for energy storage and other applications with a brief introduction to layered materials the chapters of this book gather various fascinating topics such as electrocatalysis for fuel cells lithium ion batteries sodium ion batteries photovoltaic devices thermoelectric devices supercapacitors and water splitting unique aspects of layered materials in these fields including novel synthesis and functionalization methods particular physicochemical properties and consequently enhanced performance are addressed challenges and perspectives for layered materials in these fields will also be presented with contributions from key researchers layered materials for energy storage and conversion will be of interest to students researchers and engineers worldwide who want a basic overview of the latest progress and future directions

the focus of this ebook is to bring new insights into central immune tolerance to fulfill that much has been discussed about the master in the regulation of tolerance the autoimmune regulator aire gene the main thymus cell type that expresses this gene the medullary thymic epithelial cells mtecs it includes one editorial and 12 other excellent contributions in the format of mini reviews or original research papers covering one or more of these aspects promiscuous gene expression pge epigenetics mirnas association of the aire gene and mirnas thymocyte tec interaction coxsackievirus and type 1 diabetes exosomes in the thymus thymic crosstalk thymic b cells t cell development chemokines and migration of t cells mirnas and the thymic atrophy cell cell interactions and thymus ontogeny authors raised hypothesis discuss concepts and show open questions the remaining important issues to resolve questions within the central tolerance research are briefly discussed below the first mini review is authored by olga ucar and kristin rattay they focused on the posttranscriptional control of pge by mirnas as well as epigenetic control involving dna methylation histone modifications and topology of chromosomes these processes represent additional factors to be explored and that might regulate the expression of aire independent tissue restricted antigens tras which are implicated in the central tolerance are the eph ephrins important for thymocyte tec interaction this issue was reviewed by javier garcia ceca and cols the maturation of thymocytes is depending on their interaction with tecs within the thymus authors argue the importance of ephs and ephrins on

the intrathymic maturation of both thymic epithelial microenvironment and thymocyte maturation and on the recruitment of lymphoid progenitors into the thymus another stimulating mini review is authored by hélène michaux and cols in which they discuss the hypothesis that infection by coxsackievirus b4 cv b4 could be associated with etiopathogenesis of type 1 diabetes mellitus t1d authors consider that besides their tropism to the pancreatic beta cells cv b4 could also involve the thymus once within this organ the virus might somehow perturbs central tolerance to the insulin family triggering thus autoimmune t1d our group contributed with a mini review focusing on cell cell interactions within the thymus involving tecs and thymocytes and the role of the aire gene on the induction of central tolerance throughout the modulation of tra expression in mtecs in addition we discuss the recent evidence that aire also regulate the expression of mirnas in these cells on its turn the aire dependent mirnas might exert control over tras we raise issues that besides the transcriptional control exerted by aire pge could also be being controlled through posttranscriptional mechanism involving mirnas a very pertinent question raised by gabriel skogberg and cols is on the role of exosomes on tra presentation by tecs to thymocytes and its implication in the thymocyte selection exosomes may be liberated by tecs to the extracellular milieu and transport tras as well as mhc molecules establishing intercellular communication to enhance antigen presentation to developing thymocytes authors discuss how intercellular communication via exosomes within the thymus could have consequences on tra presentation and finally on central tolerance the thymic crosstalk i e the reciprocal control by the close contact between tecs and thymocytes which influences the differentiation of both types of cells was elegantly reviewed by noëlla lopes and cols authors discuss the role of dendritic cells dcs subsets in the process of deletion of autoreactive t cells and the generation of natural tregs and raise questions how hematopoietic cells may control the organization of the thymic medulla thymus is an organ composed of different cell types including tecs dcs macrophages among other cell types and of course thymocytes recently researchers have identified an unexpected cell type formed by b cells which may be originated from intrathymic b lymphopoiesis or immigration from the periphery tomoyoshi yamano and cols contributed with a mini review discussing the role of thymic b cells expressing mhc ii cd80 and aire in the crosstalk with cd4 single positive cells authors raise questions how these cells might play a role as antigen presenting cells in an unpredicted way within the thymus the regulation of t cell development is apparently well resolved however several unsolved questions remain this important aspect is represented in this research topic through the mini review by iris caramalho and cols authors show new questions on the beginning of treg lineage commitment their spatial localization within the human thymus and their molecular components cell migration within the thymus is crucial for the central tolerance developing thymocytes migrate throughout the thymus being exposed initially to the cortex and then to the thymic medulla where they respectively undergo positive and negative selection chemokines represent key regulators for thymocyte migration zicheng hu and cols argue the role of chemokines in the thymic cell migration and induction of central tolerance thymic atrophy during senescence is widely recognized however poorly understood in addition to the atrophy due to senescence thymus involutes in response to a variety of stimuli including microbial infections the mouse model of trypanosoma cruzi infection corresponds to an adequate mouse model to access this question leandra linhares lacerda and cols show results on the role of mirnas on regulation of chemotaxis which contribute to a better understanding while incites new issues of thymic involution cellularity of mtecs is pivotal for cell cell interactions within the thymus which is required for central tolerance taishin akiyama and cols argue the role of cytokines on cellularity of mtecs focusing into the molecular basis of cell cell interactions opening perspective on the use of mathematical models for understanding these processes thymus morphogenesis is a central point with many open questions the mini review authored by arnon dias jurberg and cols addresses the role of the large superfamily of tgfbeta bone morphogenetic protein ligands in the thymus morphogenesis and in t cell differentiation this ebook provides an international and updated insight into the latest developments and open questions on the cellular and molecular bases of central tolerance induction
