this volume presents a range of studies testing some of the latest models and hypotheses in the field of second third language acquisition such as the bottleneck hypothesis slabakova 2008 2016 the scalpel model slabakova 2017 and the interface hypothesis

sorace serratrice 2009 to name a few the studies explore a variety of linguistic properties e g functional morphology linguistic properties at the syntax discourse interface by focusing on distinct populations l2 acquisition l3 ln acquisition heritage speakers while also considering the links between experimental linguistic research generative linguistics and in some cases language pedagogy dedicated to roumyana slabakova each chapter can be directly linked to her work in terms of the empirical testing of extant hypotheses the formulation of new models and ideas and her efforts to advance the dialogue between different disciplines and frameworks overall the contributions in the volume bear evidence of slabakova s enduring influence in the field as a collaborator teacher and researcher

transcultural flows of english and education in asian contexts examines issues concerning the potential of english learning and teaching to go beyond the classroom and affect the multicultural realities of asian societies asian societies often carry long histories and traditions that influence beliefs about identities which are changing in our globalizing world the authors in this volume explore the synthesis that occurs when culture is shared and re constructed in different contexts specifically the authors show how english is appropriated and refashioned through language and culture exchanges both inside and outside of traditional classrooms in east asia i e japan south korea china and southeast asia e g indonesia thailand inside the classroom transcultural flows have the potential to result in take up exchange appropriation and refashioning of language and cultural practices that can generate transcultural realities outside the classroom understanding transcultural flows may also require understanding circumstances outside of the classroom for instance transcultural exchanges that lead to friendships and professional relationships as companies embrace english and attempt to reach a global audience as english facilitates access to global interaction in cyberspace and as membership to nation states recognition and identity often confront the politics of english as a global language for both teachers and students of english the impact of transcultural connections reaches far beyond the teaching and learning experience english connects people around the globe even after students and teachers have finished their lessons or teachers have left the country to examine the transcultural flows that result from english learning and teaching in asia this book addresses the following questions what becomes of english when it is unmoored from local national and regional spaces and imaginatively reconceptualized what are new forms of global consciousness and cultural competency how is english rediscovered and

reinvented in asian countries where there are long traditions of cultural beliefs and language practices how are teachers and students taking up and appropriating english inside and outside classrooms how has english learning and teaching affected social political and business relationships this book will be of interest to scholars in sociolinguistics anthropology and education

the studies in this collection address a topic that has recently become the focus of considerable interest in second language acquisition sla research the acquisition of articles languages appear to vary in whether they have articles english german norwegian do but chinese japanese russian do not languages that have articles also appear to divide into those that realise definiteness e g english and those that realise specificity e g samoan when speakers of one type of language learn an l2 of a different type issues of central concern to sla research arise the nature of l1 influence the time course of development ultimate attainment the relationship between performance and competence and the role of universal grammar these issues are considered in nine studies written by researchers whose work is at the forefront of enquiry that offer new data new perspectives and new insights into the way l2 speakers acquire articles

this book addresses several issues that have been controversial in the literature surrounding second language l2 acquisition including the role that the first language l1 plays in development the ability of l2 learners to acquire properties of functional categories not realised in their l1 the nature of l2 development itself and the extent to which such development is constrained by innate linguistic capacities universal grammar these issues are considered by investigating the acquisition of the english articles by speakers of an l1 that has an article system encoding definiteness arabic and an l1 that lacks articles japanese at different proficiency levels in english those who will find this book useful include policy makers in language education as well as students and their teachers researchers in the field of second language acquisition can benefit from reading this book to keep abreast of the latest developments in this area in the hope of stimulating further research

first published in 1998 in this book the author presents the view that although many linguists have been interested in specific indefinites their theories are not quite satisfactory in that they have only tried to explore some aspects of specific indefinites this paper assumes a standard notion of specificity i e the notion of someone having in mind an individual or a relation under this

assumption there is an attempt to review previous studies on specific indefinites and propose a new theory of specificity which i believe can capture all aspects which the previous studies have explored this leads us to a new information theory which is partially representational and partially denotational and which is useful for dealing with conversational aspects like the distinction between the speaker and the audience

fifteen specially written papers examine the ways in which the content of what we say is dependent on the context in which we say it at the centre of the current debate on this subject is cappelen and lepore s claim that context sensitivity in language is best captured by a combination of semantic minimalism and speech act pluralism using this theory as their starting point the contributors to this volume develop a variety of different views about the role of context in communication and reveal its wide ranging implications for all issues in the philosophy of language and linguistics

linguists and others have realised for some time that predicates of the know and wonder classes behave differently in semantic terms with respect to their interrogative complements but have not so far fully understood how or why this book seeks to explore and to provide solutions to this and to related problems in explaining the meaning and grammar of embedded interrogatives and the predicates that take interrogative complements the investigation extends to the semantics of adverbs of quantification theories of plurals and lexical selection the work is addressed to those working in semantics and to syntacticians concerned with the constraints that syntactic structure imposes on semantic interpretation it is at the heart of current research in the syntax semantics interface although some knowledge of formal semantics is assumed the book has been written to be accessible to researchers in computer science philosophy and cognitive science

this handbook documents the main trends in current research between logic and language including its broader influence in computer science linguistic theory and cognitive science the history of the combined study of logic and linguistics goes back a long way at least to the work of the scholastic philosophers in the middle ages at the beginning of this century the subject was revitalized through the pioneering efforts of gottlob frege bertrand russell and polish philosophical logicians such as kazimierz ajdukiewicz around 1970 the landmark achievements of richard montague established a junction between state of the art

mathematical logic and generative linguistic theory over the subsequent decades this enterprise of montague grammar has flourished and diversified into a number of research programs with empirical and theoretical substance this appears to be the first handbook to bring logic language interface to the fore both aspects of the interaction between logic and language are demonstrated in the book i e firstly how logical systems are designed and modified in response to linguistic needs and secondly how mathematical theory arises in this process and how it affects subsequent linguistic theory the handbook presents concise impartial accounts of the topics covered where possible an author and a commentator have cooperated to ensure the proper breadth and technical content of the papers the handbook is self contained and individual articles are of the highest quality

economics toward sustainable development an ecological economics approach combines analysis theory and empiricism to answer the whats whys and hows of moving towards sustainable development since the ecological economics approach to sustainable development is still a relatively new paradigm its long term success rests heavily on the formalized establishment of the most basic and fundamental principles this volume discusses the formation of these principles and their implementation in the real world lawn establishes the ground rules by showing that development need not be achieved at the expense of ecological sustainability he presents the tools guidelines and conceptual framework necessary to move toward sustainable development filled with figures tables and illustrations toward sustainable development an ecological economics approach systematically develops a conceptual framework from which to design workable policies the author shows that development and ecological sustainability don't have to be trade offs but can be complimentary and outlines a range of economic and non economic indicators to measure performance
