in great songwriting techniques veteran composer and teacher jack perricone shares years of experience in the art science and

pedagogy of songwriting to teach readers the craft

helping kids achieve their best is a practical guide to motivating younger and older learners across the globe the book explores why some students are easier to motivate than others and why students lose motivation as well as outlining strategies that teachers can use in the classroom and that parents can use at home comprehensively updated this second edition includes a new chapter on student achievement emotion throughout the text each chapter includes a variety of examples and research based tools that can be put into action immediately along with vignettes question points action stations and recommended readings which help educators apply the suggested approaches in their own contexts the book is hands on and interactive inviting readers to recall challenges they have faced in their own teaching or parenting experiences and to apply what they have learned to better understand and cope with these challenges more effectively this book is an essential resource for pre and in service teachers as well as parents who aspire to motivate their children and help them achieve their best

psychosomatic diseases are a group of diseases closely related to psychosocial factors but mainly manifested by somatic symptoms involving respiratory digestive endocrine and other systems as a result the lack of consensus on its diagnosis has plagued clinical treatment in internal medicine surgery and psychiatry for decades in recent years research on the pathogenesis of psychosomatic diseases has made significant progress for example franz alexander believes that unresolved subconscious conflicts are the main cause of psychosomatic disorders the subconscious psychological conflict is caused by the changes in the functional activities of the autonomic nervous system acting on the corresponding special organs and patients with susceptible qualities similarly mental and psychological factors affect gastrointestinal sensory and motor functions through the autonomic

nervous system brain gut axis and neuroendocrine system meanwhile gastrointestinal symptoms also affect emotions and behaviors through the brain gut axis in addition the cannon bard theory of emotional physiology and pavlovian theory of higher neural activity types from quantitative research methods to study the relationship between conscious psychological factors such as emotions and measurable physiological and biochemical changes in clinical work the treatment of psychosomatic diseases has gradually shifted from emphasizing physical treatment to comprehensive treatment principles that is taking into account the psychological and behavioral aspects of the physical treatment of the primary disease the main purpose of physical treatment of the primary disease is to control or relieve symptoms to consolidate the treatment of psychosomatic diseases and reduce the recurrence of psychosomatic diseases combining physical therapy with necessary psychotherapy would potentially obtain a more comprehensive curative effect
