this collection of essays presents a contextual view of genocide the authors who are academic authorities and practitioners in the field explore the legal treatment but also the social and political concepts and historical dimensions of the crime they also suggest alternative justice solutions to the phenomenon of genocide divided into five parts the first section offers an historical perspective of genocide the second consists of case studies examining recent atrocities the third section examines differences between legal and social concepts of genocide part four discusses the treatment of genocide in courts and tribunals throughout the world the final section covers alternatives to trial justice and questions of prevention and sentencing

amnesty laws are political tools used since ancient times by states wishing to quell dissent introduce reforms or achieve peaceful relationships with their enemies in recent years they have become contentious due to a perception that they violate international law particularly the rights of victims and contribute to further violence this view is disputed by political negotiators who often argue that amnesty is a necessary price to pay in order to achieve a stable peaceful and equitable system of government this book aims to investigate whether an amnesty necessarily entails a violation of a state s international obligations or whether an amnesty accompanied by alternative justice mechanisms can in fact contribute positively to both peace and justice this study began by constructing an extensive amnesty law database that contains information on 506 amnesty processes in 130 countries introduced since the second world war the database and chapter structure were designed to correspond with the key aspects of an amnesty why it was introduced who benefited from its protection which crimes it covered and whether it was conditional in assessing conditional amnesties related transitional justice processes such as selective prosecutions truth commissions community based justice mechanisms lustration and reparations programmes were considered subsequently the jurisprudence relating to amnesty from national courts international tribunals and courts in third states was addressed the information gathered revealed

considerable disparity in state practice relating to amnesties with some aiming to provide victims with a remedy and others seeking to create complete impunity for perpetrators to date few legal trends relating to amnesty laws are emerging although it appears that amnesties offering blanket unconditional immunity for state agents have declined overall amnesties have increased in popularity since the 1990s and consequently rather than trying to dissuade states from using this tool of transitional justice this book argues that international actors should instead work to limit the more negative forms of amnesty by encouraging states to make them conditional and to introduce complementary programmes to repair the harm and prevent a repetition of the crimes david dyzenhaus this is one of the best accounts in the truth and reconciliation literature i ve read and certainly the best piece of work on amnesty i ve seen diane orentlicher ms mallinder s ambitious project provides the kind of empirical treatment that those of us who have worked on the issue of amnesties in international law have long awaited i have no doubt that her book will be a much valued and widely cited resource
