In May 1998, in reaction to India's nuclear weapons tests, Pakistan tested six nuclear weapons. Following this, the country opted for a policy of minimum deterrence, and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changing strategic environment. After providing a brief historical background, exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual/theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this, as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence conceptually, providing a deeper understanding of Pakistan's post-1998 nuclear policy. This book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of nuclear policy, security studies, Asian politics, proliferation, non-proliferation studies and peace studies. This book will be of interest to policy makers, scholars and students of nuclear policy, nuclear proliferation and arms control related research.

This book investigates the UK's nuclear weapon policy, focusing in particular on how consecutive governments have managed to maintain the Trident weapon system.
