how dominant culture from sexism and homophobia to racism capitalism ableism and more has limited the science of animal behavior and how we can free ourselves from these limited perspectives in feminism in the wild ambika kamath and melina packer reveal how scientists studying animal behavior have long projected human norms and values onto animals while seeking to understand them when scientific studies conclude that these norms and values are natural in animals it makes it easier to think of them as natural in humans too and because scientists historically and to this day largely belong to elite powerful segments of society the norms and values embedded in animal behavior science match those of the already powerful how can animal behavior science escape this trap of naturalizing dominant culture drawing from decades of feminist antiracist queer disability justice and marxist contributions including those of biologists kamath and packer break down persistent assumptions in the status quo of animal behavior science and offer a multitude of alternative approaches core concepts in animal behavior science and evolutionary biology from sex categories and sexual selection to fitness adaptation biological determinism and more are carefully contextualized and critically reexamined this unique collaboration between an animal behavior scientist and a feminist science studies scholar is an illuminating and hopeful

read for anyone who is curious about how animals behave and anyone who wants to break free from scientific approaches that perpetuate systems of oppression
