our tax system is a mess and the reason for that mess is our tax system is incoherent a well designed tax system is like a good jigsaw puzzle all the pieces fit together snugly so when the whole thing is fully assembled it forms a coherent picture but our current tax system is disjointed with parts that don t logically fit together that results in inconsistencies complexity loopholes and distorted incentives we need a tax system that make sense as this book shows however making a traditional income tax coherent is an impossible goal but coherence is achievable if we adjust our target and complete the switch to a consumed income tax a system that taxes all income not when it is earned but when that income is consumed the move towards a consumed income tax was begun decades ago when we first adopted iras and other tax deferred savings accounts we just needed to complete the evolution the book explores a variety of tax issues among them savings small businesses owner occupied houses

and corporations and develops seven groups of recommended changes these changes would result in a tax system that would be pro growth by eliminating the existing disincentives to saving and investment but the tax system would also remain progressive with the wealthy taxed as much as and perhaps even more than currently that combination could make the recommended changes attractive to members of both parties and might bring to a close the political seesaw in tax policy that we've experienced over that last several decades
