collects martin heidegger s pivotal writings on art its role in human life and culture and its relationship to thinking and truth publisher description

continues and extends explorations begun in being and time

in this groundbreaking new work dillard makes a powerful case for bringing contemporary christian theology into critical dialogue with martin heidegger s contributions to philosophy of the event following his initial receptivity to theology in his early writings heidegger becomes increasingly agnostic and even atheistic in the 1930s until the sudden resurgence of religious discourse in contributions dillard shows that there are good reasons for heidegger s striking reversal key philosophical concepts from contributions enable heidegger to overcome earlier theological conundrums left unresolved in his earlier engagements with themes in st paul and luther while the need to make a fateful decision regarding the last god prevents the central philosophical task of contributions from collapsing into empty tautology or relapsing into objectionable metaphysics nevertheless heidegger leaves us in the predicament of having no clear idea of how we are to make the crucial decision about divinity after considering several unsuccessful proposals for escaping the dilemma dillard develops a christological solution based on heidegger s engagement with the poetry of georg trakl the resulting theological perspective is defended from some possible criticisms and situated within the broader context of contemporary postmetaphysical heideggerian theology

a defense of poetry argues that literature can be defined pragmatist and historicist arguments notwithstanding and that in its definition its unique value can be discovered in qualified opposition to the most sophisticated formalist definitions involving redundancy or economy of expression the author identifies literature ontologically as a sign of the preconceptual as the ostensive moment that discloses neither the purpose nor the structure of existence but existence itself revealed in its nonhuman register

in philosophical enactment and bodily cultivation in early daoism thomas michael illuminates the formative early history of the daodejing and the social political religious and philosophical trends that indelibly marked it this book centers on the matrix of the daodejing that harbors a penetrating phenomenology of the dao together with a rigorous system of bodily cultivation it traces the historical journey of the text from its earliest oral circulations to its later transcriptions seen in a growing collection of ancient chinese excavated manuscripts it examines the ways in which huang lao thinkers from the han dynasty transformed the original phenomenology of the daodejing into a metaphysics that reconfigured its original matrix and it explores the success of the wei jin daoist ge hong in bringing the matrix back into its original alignment this book is an important contribution to cross cultural studies bringing contemporary chinese scholarship on daoism into direct conversation with western scholarship on daoism the book also concludes with a discussion of martin heidegger s recognition of the position and value of the daodejing for the future of comparative philosophy

rhetorical realism responds to the surging interest in nonhumans across the humanities by exploring how realist commitments have historically accompanied understandings of rhetoric from antiquity to the present for a discipline that often defines itself according to human speech and

writing the nonhuman turn poses a number of challenges and opportunities for rhetoric to date many of the responses to the nonhuman turn in rhetoric have sought to address rhetoric's compatibility with new conceptions of materiality in rhetorical realism scot barnett extends this work by transforming it into a new historiographic methodology attuned to the presence and occlusion of things in rhetorical history through investigations of rhetoric's place in aristotelian metaphysics the language invention movement of the seventeenth century and postmodern conceptions of rhetoric as an epistemic art barnett's study expands the scope of rhetorical inquiry by showing how realist ideas have worked to frame rhetoric's scope and meanings during key moments in its history ultimately barnett argues that all versions of rhetoric depend upon some realist assumptions about the world rather than conceive of the nonhuman as a dramatic turning point in rhetorical theory rhetorical realism encourages rhetorical theorists to turn another eye toward what rhetoricians have always done defining and configuring rhetoric within a broader ontology of things

this book studies wallace stevens and pre socratic philosophy showing how concepts that animate stevens poetry parallel concepts and techniques found in the poetic works of parmenides empedocles and xenophanes and in the fragments of heraclitus tompsett traces the transition of pre socratic ideas into poetry and philosophy of the post kantian period assessing the impact that the mythologies associated with pre socratism have had on structures of metaphysical thought that are still found in poetry and philosophy today this transition is treated as becoming increasingly important as poetic and philosophic forms have progressively taken on the existential burden of our post theological age tompsett argues that stevens poetry attempts to play its audience into an ontological ground in an effort to show that his reduction of metaphysics is not dry philosophical imposition but is enacted by our encounter with the poems themselves through an analysis of the language and form of stevens poems tompsett uncovers the mythology his poetry shares with certain pre socratics and with greek tragedy this shows how such mythic rhythms are apparent within the work of friedrich nietzsche martin heidegger and hans georg gadamer and how these rhythms release a poetic understanding of the violence of a reduction of metaphysics

heidegger and ethics is a contentious conjunction of terms martin heidegger himself rejected the notion of ethics while his endorsement of

nazism is widely seen as unethical this major new study examines the complex and controversial issues involved in bringing them together by working backwards through his work from his 1964 claim that philosophy has been completed to being and time his first major work joanna hodge questions heidegger s denial that his enquires were concerned with ethics she discovers a form of ethics in heidegger s thinking which elucidates his important distinction between metaphysics and philosophy against many contemporary views she proposes therefore that ethics can be retrieved and questions the relation between ethics and metaphysics that heidegger had made so pervasive

we usually think about language and pain as opposites the one being about expression and connection the other destructive beyond words so to speak and isolating language pangs challenges these familiar conceptions and offers a radical reconsideration of the relationship between pain and language in terms of an essential interconnectedness ilit ferber s premise is that we cannot probe the experience of pain without taking account its inherent relation to language and vice versa that our understanding of the nature of language essentially depends on how we take account of its correspondence with pain language pangs brings together discussions of philosophical as well as literary texts an intersection that is especially productive in considering the phenomenology of pain and its bearing on language ferber explores a phenomenology of pain and its relation to language before providing a unique close reading of johann gottfried herder s treatise on the origin of language the first modern philosophical text to consider language and pain establishing the cry of pain as the origin of language herder also raises important claims regarding the relationship between human and animal questions of sympathy and the role of hearing in the expression of pain beyond herder the book grapples with the work of other profound thinkers including martin heidegger stanley cavell and finally sophocles from them weaving new insights on the experience of pain expression sympathy and hearing

this book presents the work of leading hermeneutical theorists alongside emerging thinkers examining the current state of hermeneutics within the pentecostal tradition the volume s contributors present constructive ideas about the future of hermeneutics at the intersection of theology of the spirit pentecostal christianity and other disciplines this collection offers cutting edge scholarship that engages with and pulls from a broad range of fields and points toward the future of pneumatological hermeneutics the volume s interdisciplinary essays are broken up into

four sections philosophical hermeneutics biblical theological hermeneutics social and cultural hermeneutics and hermeneutics in the social and physical sciences

in the triadic structure of the mind francesco belfiore begins from the basic ontological conception of the structure and functioning of the mind or spirit as an evolving conscious triad composed of intellect sensitiveness and power each exerting a selfish or moral activity based on this concept belfiore has developed a coherent philosophical system through which he offers fresh solutions in the fields of ontology knowledge language aesthetic ethics politics and law the second edition of the book includes a more extensive treatment of the topics addressed in the first edition the introduction of new concepts and the inclusion of additional thinkers whose views have been discussed and reinterpreted

in the first book to examine the overlooked relationship between musical improvisation and philosophical hermeneutics sam mcauliffe asks what exactly is improvisation and how does it relate to our being in the world improvisation in music and philosophical hermeneutics answers these questions by investigating the underlying structure of improvisation mcauliffe argues that improvising is best understood as attending and responding to the situation in which one finds itself and as such is essential to how we engage with the world working within the hermeneutic philosophical tradition drawing primarily on the work of martin heidegger hans georg gadamer and jeff malpas this book provides a rich and detailed account of the ways in which we are all already experienced improvisers given the dominance of music in discussions of improvisation part i of this book uses improvised musical performance as a case study to uncover the ontological structure of improvisation a structure that mcauliffe demonstrates is identical to the structure of hermeneutic engagement exploring this relationship between improvisation and hermeneutics part ii offers a new reading of gadamer's philosophical hermeneutics examining the way in which gadamer's accounts of truth and understanding language and ethics each possess an essentially improvisational character working between philosophy and music theory improvisation in music and philosophical hermeneutics unveils the hermeneutic character of musical performance the musicality of hermeneutic engagement and the universality of improvisation

this volume presents a selection of hubert dreyfus's pioneering work in bringing phenomenology and existentialism to bear on the philosophical

and scientific study of the mind each of the thirteen essays interprets develops and extends the insights of his predecessors working in the european philosophical tradition one of dreyfus central contributions to reading the historical canon of philosophy comes from his recognition that great philosophers help us to understand the background practices of a culture the practices that shape and embody our most basic understanding of ourselves and the things and situations we encounter in our world background practices are all too often overlooked completely or else their importance is misunderstood each chapter in this volume shows in one way or another how a broad range of philosophical topics can only be properly understood when we recognize how they are grounded in the background practices that shape our lives and give meaning to our activities our tasks our normative commitments our aims and our goals

this important new book condenses and rephrases paragraph by paragraph the entirety of heidegger s magnum opus being and time leading heidegger scholar thomas sheehan renders the text in reader friendly language that avoids the worst of the heideggerese that persists in the wider scholarship he helpfully outlines each of the six chapters and in turn each of the eighty three individual sections of the book providing a critical and insightful commentary that draws on heidegger s comments on being and time throughout his career the book also includes commentary and guidance on the terminology scope arguments achievements and limitations of being and time this reader s guide is an essential resource for students scholars and anyone engaging with heidegger s complex work

providing crucial scholarship on derrida s first series of lectures from the nationality and philosophical nationalism cycle herman rapaport brings all 13 parts of the phantom of the other series 1984 85 to our critical attention the series rapaport argues was seminal in laying the foundations for the courses given and ideas explored by derrida over the next twenty years it is in this vein that the full explication of derrida s lectures is done breathing life into the foundational lecture series which has not yet been published in its entirety in english derrida s examination of a master signifier of the social relation geschlecht acts as the critical entry point of the series into wide ranging meditations on the social construction and deconstruction of all possible relations denoted by the core concept including race gender sex and family the lecture series vast engagement with a range of major thinkers including philosophers and poets alike arendt adorno heidegger wittgenstein trakt and adonis

tackles core themes and debates about philosophical nationalism presenting derrida s lectures on the implications of key 20th century philosopher s understandings of nationalism as they relate to concerns over idiomatic language notions of race exile return and social relations adds richly to the literature on derrida and reveals the potential for further application of his work to current polarising debates between universalism and tribalism

once one understands the nature and magnitude of defuturing as the negation of world futures how one has to account for the history and making of the material world including design dramatically changes defuturing as our condition forces the generation of a new philosophy of design with these thoughts this book presents a radically new understanding of the history context and futures of designing first published in 1999 now reissued with a new preface by the author defuturing a new design philosophy is a prescient and powerful account of what it means to comprehend that we live in world that is taking away futures for ourselves and non human others arguing that designing is doubly implicated in this process first in its roles in helping to create the unsustainable but second re thought through the lens of defuturing as a mode of acting in the world that can help contest the negation of the world defuturing transforms our comprehension of designing and of how futures can be constituted working not through abstract theorizing but through the analysis of concrete examples the book uses historical material on design to expose the archaeology of defuturing shattering the illusion that the future simply is defuturing confronts designing with the challenge of remaking while offering the elements of a new practical reasoning of design acting

although philosophers have examined and commented on music for centuries martin heidegger one of the greatest philosophers of the 20th century had frustratingly little to say about music directly at least this volume the first to tackle heidegger and music features contributions from philosophers musicians educators and musicologists from many countries throughout the world aims to utilize heidegger s philosophy to shed light on the place of music in different contexts and fields of practice heidegger s thought is applied to a wide range of musical spheres including improvisation classical music electronic music african music ancient chinese music jazz rock n roll composition and musical performance the volume also features a wide range of philosophical insights on the essence of music music s place in society and the promise

of music's ability to open up new ways of understanding the world with the onset of the technological and digital musical age heidegger and music breaks new philosophical ground by showcasing creative vignettes that not only push heidegger's concepts in new directions but also get us to question the meaning of music in various contexts

the heart of history for heidegger is not a sequence of occurrences but the eruption of significance at critical junctures that bring us into our own by making all being including our being into an urgent issue in emergency being emerges from the emergency of being the esoteric contributions to philosophy often considered martin heidegger's second main work after being and time is crucial to any interpretation of his thought here heidegger proposes that being takes place as appropriation richard polt's independent minded account of the contributions interprets appropriation as an event of emergency that demands to be thought in a future subjunctive mode polt explores the roots of appropriation in heidegger's earlier philosophy heidegger's search for a way of thinking suited to appropriation and the implications of appropriation for time space human existence and beings as a whole in his concluding chapter polt reflects critically on the difficulties of the radically antirationalist and antimodern thought of the contributions polt's original reading neither reduces this challenging text to familiar concepts nor refutes it but engages it in a confrontation an encounter that respects a way of thinking by struggling with it he describes this most private work of heidegger's philosophy as a dissonant symphony that imperfectly weaves together its moments into a vast fugue under the leitmotif of appropriation this fugue is seeded with possibilities that are waiting for us its listeners to develop them some are dead ends viruses that can lead only to a monolithic monotonous misunderstanding of history others are embryonic insights that promise to deepen our thought and perhaps our lives if we find the right way to make them our own
