combines classic and cutting edge scholarship on personal social networks a must have resource for both newcomers and seasoned experts

the connected city explores how thinking about networks helps make sense of modern cities what they are how they work and where they are headed cities and urban life can be examined as networks and these urban networks can be examined at many different levels the book focuses on three levels of urban networks micro meso and macro these levels build upon one another and require distinctive analytical approaches that make it

possible to consider different types of questions at one extreme micro urban networks focus on the networks that exist within cities like the social relationships among neighbors that generate a sense of community and belonging at the opposite extreme macro urban networks focus on networks between cities like the web of nonstop airline flights that make face to face business meetings possible this book contains three major sections organized by the level of analysis and scale of network throughout these sections when a new methodological concept is introduced a separate method note provides a brief and accessible introduction to the practical issues of using networks in research what makes this book unique is that it synthesizes the insights and tools of the multiple scales of urban networks and integrates the theory and method of network analysis

this title was first published in 2002 there is a multitude of assessment methods available for analyzing and reporting on the impacts of policies all with different underlying assumptions and a wide range of criteria since the 1950s much research has gone into creating guidelines for policy analysis yet only a small percentage of evaluation has been carried out on transport policy and none by political scientists or social policy specialists the editors of this volume recognize that european integration has seen a drive to bring policy evaluation on to the transport agenda and has increased demands for strategic assessments it has become apparent that to gain a fuller understanding of the success of a transport programme a much more complex combination of analytical methods must be used and a set of guidelines specifically for the field of transport must be developed this book achieves this by bringing together a multidisciplinary team of analysts from throughout the eu to discuss in a much broader way the various types of assessment methods and how they can best be used to evaluate transport programmes and systems both individually and in combination

over this last decade the concept of social metabolism has gained prestige as a theoretical instrument for the required analysis to such an extent that there are now dozens of researchers hundreds of articles and several books that have adopted and use this concept however there is a great deal of variety in terms of definitions and interpretations as well as different methodologies around this concept which prevents the consolidation of a unified field of new knowledge the fundamental aim of the book is to conduct a review of the past and present usage of the concept of social metabolism its origins and history as well as the main currents or schools that exist around this concept at the same time the reviews and discussions included are used by the authors as starting points to draw conclusions and propose a theory of socio ecological transformations the theoretical and methodological innovations of this book include a distinction of two types of metabolic processes tangible and intangible the analysis of the social metabolism at

different scales in space and time and a theory of socio ecological change overcoming the merely systemic or cybernetic nature of conventional approaches giving special protagonism to collective action

what are values how are they different from attitudes traits and specific goals how do our values influence our behavior and vice versa how does our culture and environment impact the relationship between values and behavior these questions and more are rigorously examined by prominent and emerging scholars in this significant volume values and behavior taking a cross cultural perspective personal values are cognitive representations of abstract desirable motivational goals that guide the way individuals select actions evaluate people and events and explain their actions and evaluations the unique features of values have implications for their impact on behavior people are highly satisfied with their values and perceive them as close to their ideal selves at the same time however daily interpersonal interaction reveals that individuals hold different sometimes opposing value profiles these individual differences are even more apparent when individuals from different cultures interact the collected chapters address the links between values and behavior from a cultural perspective they review studies conducted in various cultures and discuss culture as a moderator of the relationships between values and behavior structurally part i of the volume discusses what values are and how they should be measure part ii then examines the contents of the relationships between values and behavior in different life domains including prosocial behavior aggression behavior in organizations and relationships formation part iii explores some of the moderating mechanisms that relate values to behavior taken together these chapters review and synthesize over twenty years of research on values and behavior and propose new insights that have important implications for both research and for practice

for almost thirty years sociologists have increasingly theorized about and conducted research on human emotions surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry what makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions it was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis this book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of

emotions the outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs the first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions the second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution while there is little integration among these theories this state of affairs will not last forever the third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions while this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization the last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements these chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology although no book can completely cover a field even a relatively new one like the sociology of emotions this handbook of the sociology of emotions comes close to being comprehensive the reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years

recognized as the definitive reference this handbook brings together leading experts from multiple psychological subdisciplines to examine one of today's most dynamic areas of research coverage encompasses the biological and neuroscientific underpinnings of emotions as well as developmental social and personality cognitive and clinical perspectives the volume probes how people understand experience express and perceive affective phenomena and explores connections to behavior and health across the lifespan concluding chapters present cutting edge work on a range of specific emotions illustrations include 10 color plates new to this edition chapters on the mechanisms processes and influences that contribute to emotions such as genetics the brain neuroendocrine processes language the senses of taste and smell chapters on emotion in adolescence and older age and in neurodegenerative dementias chapters on facial expressions and emotional body language chapters on stress health gratitude love and empathy many new authors and topics extensively revised with the latest theoretical and methodological innovations a choice outstanding academic title
