chemical admixtures are used to modify the properties and behaviour of fresh and hardened concrete they enable more economic construction and the achievement of special properties such as high strength or durability this book presents new research information from an international rilem symposium on six main topics workability setting strength durability other properties and technology

naachtun was a major maya capital during the early classic period 150 550 ce marked by impressive monumental architecture this book explores how such construction influenced urban demographics showing that architectural grandeur attracted and anchored a growing population

preface adhesion is a phenomenon architects and civil engineers are not very familiar with in other disciplines knowledge about surface properties and the background of bonding energies is also far from satisfactory nevertheless there are many important applications in concrete engineering where adhesion is necessary for success and durability these include coating and painting repair of concrete surfaces bonding of fresh to old concrete crack injection glueing of precast elements glueing of steel to concrete etc in 1981 rilem established the technical committee 52 rac resin adherence to concrete the main aims of the committee s work were to collect research results and practical experiences to initiate and coordinate research programs to develop on a scientific base test methods for

field and for laboratory purposes one of the results of the committee's work is a state of the art report which will be presented orally as a general report at the international symposium isap 86 and will be printed either in the rilem journal materials and structures or separately several test recommendations have been elaborated and will be prepared as drafts for the participants of isap 86 these are direct tensile test pull off test direct shear test slant shear test four point bending test dynamic loading test thermal compatibility test two versions injectibility test

cet ouvrage propose un état de l'art exhaustif et actualisé des connaissances liées aux problèmes de corrosion et aux solutions éprouvées pour prévenir et lutter contre ce type de dégradation dont les incidences peuvent être considérables tant techniques que sécuritaires qu'économiques conçus par des éditeurs scientifiques de grande expérience coordonnés par des praticiens compétents et rédigés par les meilleurs spécialistes du domaine les 48 chapitres de ce livre traitent en détail des phénomènes de corrosion dans le béton armé les réseaux et les circuits d'eau les structures et les enveloppes des bâtiments les principales méthodes de contrôle et d'analyse de la corrosion sont également exposées ainsi que la démarche d'expertise et les différentes normes et réglementations en vigueur l'ensemble est précédé d'un exposé introductif sur la problématique des monuments historiques et d'un rappel des principes de la corrosion et des modes de prévention et de lutte cet ouvrage de référence à la double approche scientifique et technologique contient de nombreuses données pratiques souvent illustrées avec des images en couleur il s'adresse aux étudiants aux enseignants et chercheurs et particulièrement aux professionnels du bâtiment du génie civil et des ouvrages industriels pour lesquels il constitue une aide précieuse dans le choix de matériaux et ou de procédés permettant de prévenir la dégradation des structures et des équipements

construction history construction heritage recent construction historiography industrialization engineering sciences building materials building actors construction history is still a fairly new and small but quickly evolving field the current trends in construction history are well reflected in the papers of the present conference construction history has strong roots in the historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile

shifted notably to include more recent and also more distant histories as well this is reflected in these conference proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century the conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of construction history papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences the conference integrates perfectly into the daily work at the institute for preservation and construction history at eth zurich its two chairs the chair for building archaeology and construction history and the chair for construction heritage and preservation endeavor to cover the entire field and to bridge the gaps between the different approaches methodologies and disciplines between various centuries as well as technologies learning together and from each other the proceedings of 8icch give a representative picture of the state of the art in the field and will serve as a reference point for future studies
