fifty years ago medicine was straightforward doctors had limited therapeutic options and patients did as they were told today an
 array of medial interventions is putting increasing pressure on limited resources patients are questioning everything and doctors
 are uncertain of their role health economists hoped to offer important insights to aid decision making but their technical

frameworks bore little resemblance to the practical requirements of end users now this book presents the concepts and insights that health economics has to offer in a way that is accessible to every healthcare decision maker getting health economics into practice is for all those who are involved in the planning commissioning and delivery of healthcare it illuminates the practical value that the concepts and principles of health economics can offer decision makers at all levels comprehensive and extensive it is the first such book to be edited by a clinician rather than a health economist with contributions from an expert panel of specialists this approach ensures it is accessible and useful in the everyday work of health professionals it is relevant for all healthcare sectors in particular for primary care trusts and is essential reading for managers researchers and especially practitioners

let canada s 1 pharmacology text guide you in mastering the complicated world of nursing pharmacology now in its fifth edition lilley s pharmacology for canadian health care practice covers all the key pharmacology content needed by today s canadian nurses known for its vibrant design abundance of visuals and wealth of helpful feature boxes this engaging text brings important pharmacology concepts to life the book s popular and unique key drug approach focuses on the drug information you need to know to safely and effectively administer drugs providing exam preparation and insightful learning strategies this complete and proven pharmacology text helps you succeed in school clinicals and professional practice

the changing landscape of health care continues to grow more diverse as young health professionals move into clinical practice and face challenging health demands and increasing health care costs they must be prepared to work in interprofessional teams despite a lack of experience in team based skills interprofessional healthcare education and practice for rural and underserved

populations represents a collective response to this problem from educators clinicians and community health leaders to create a resource for interprofessional education and practice divided into five sections this book includes the necessary information to encourage dialogue debate and action in interprofessional education needed to meet the health care needs for the present and the future

fraudulent harmful or at best useless pharmaceutical and therapeutic approaches developed outside science based medicine have boomed in recent years especially due to the commercialisation of cyberspace the latter has played a fundamental role in the rise of false health experts and in the creation of filter bubbles and echo chambers that have contributed to the formation of highly polarised debates on non science based health practices online as well as offline by adopting a multidisciplinary approach this edited book brings together contributions of international academics and practitioners from criminology digital sociology health psychology medicine law physics and journalism where they critically analyse different types of non science based health approaches with this volume we aim to reconcile different scientific understandings of these practices synthesising a variety of empirical theoretical and interpretative approaches and exploring the challenges implications and potential remedies to the spread of dangerous and misleading health information this edited book will offer some food for thought not only to students and academics in the social sciences health psychology and medicine among other disciplines but also to medical practitioners science journalists debunkers policy makers and the general public as they might all benefit from a greater awareness and critical knowledge of the harms caused by non scientific health practices

this volume focuses on nine countries that have completed or are well along in the process of carrying out major health financing

reforms these countries have significantly expanded their people's health care coverage or maintained such coverage after prolonged political or economic shocks e.g following the collapse of the soviet union in doing so this report seeks to expand the evidence base on good performance in health financing reforms in low and middle income countries the countries chosen for the study were chile colombia costa rica estonia the kyrgyz republic sri lanka thailand tunisia and vietnam
