this book is not a conventional political narrative of carolingian history shaped by narrative sources capitularies and charter material it is structured instead by numismatic diplomatic liturgical and iconographic sources and deals with political signs images and fixed formulas in them as interconnected elements in a symbolic language that was used in the indirect negotiation and maintenance of carolingian authority building on the comprehensive analysis of royal liturgy intitulture iconography and graphic signs and responding to recent interpretations of early medieval politics this book offers a fresh view of carolingian political culture and of corresponding roles that royal imperial courts larger monasteries and human agents played there

this study reconstructs f w j schelling s philosophy of language based on a detailed reading of 73 of schelling s lectures on the philosophy of art daniel whistler argues that the concept of the symbol present in this lecture course and elsewhere in schelling s writings of the period provides the key for a non referential conception of language where what matters is the intensity at which identity is produced such a reconstruction leads whistler to a detailed analysis of schelling s system of identity his grand project of the years 1801 to 1805 which has been continually neglected by contemporary scholarship in particular whistler recovers the concepts of quantitative differentiation and construction as central to schelling s project of the period this reconstruction also leads to an original reading of the origins of the concept of the symbol in german thought there is not one romantic symbol but a whole plethora of experiments in theorising symbolism taking place at the turn of the nineteenth century at stake then is schelling as a philosopher of language schelling as a systematiser of identity and schelling as a theorist of the symbol

this book will attempt to achieve a constructive and positive correlation between mythic symbolic language and philosophical anthropology it is intended as a reflection on the philosophical accomplishment of paul ricoeur the term mythic symbolic language in this context means the language of the multivalent symbol given in the myth with its psychological and poetic counterparts the term symbol is not conceived as an abstract sign as it is used in symbolic logic but rather as a concrete phenomenon religious psychological and poetic the task inherent in this correlation is monumental when one considers the dual dilemma of problematic and possibility which is at its heart the problematic arises out of the apparent difficulty presented by the so called challenge of modernity which seems to require the elimination of mythic symbolic language as an intelligible mode of communication mythic symbolic language is sometimes eliminated because in a world molded by abstract conceptualizations of science such a language is thought to be unintelligible the claim is that its primitive explanations have been transcended by our modernity others believe that the problem of mythic symbolic language is the problem of the myth if the mythic forms of language could be eliminated the truth of such language could be preserved through its translation into an intelligible mode of discourse the problematic is heightened further by the relation of considerations of language to philosophical anthropology any consideration of language involves a related view of the nature of man
