this textbook is for a first course on electronics it assumes no prior electronics experience but does assume that students have had calculus 1 single variable differential calculus and high school physics a key idea of the course is that students need a lot of design experience and hands on work rather than a lot of theory the course is centered around the labs which are a mix of design labs and measurement modeling labs this unique volume takes students from knowing no electronics to being able to design and build amplifier and filter circuits for connecting sensors to microcontrollers within 20 weeks students design a digital thermometer a blood pressure meter an optical pulse monitor an ekg an audio preamplifier and a class d power amplifier they also learn how to measure and characterize components including impedance spectroscopy of a loudspeaker and of electrochemical electrodes related link s

of all the components that go into electronic equipment the printed circuit probably requires more manufacturing operations each of which must be performed by a skilled person than any other as a shift supervisor early in my printed circuit career i had to hire and train personnel for all job functions the amount of responsibility delegated to my subordinates depended strictly on how well i had been able to train them training people can be a trying experience and is always a time consuming one it behooved me to help my workers obtain the highest degree of job understanding and skill that they and i were capable of one hindrance to effective teaching is poor continuity of thought for example having to say to a trainee wait a minute forget what i just told you we have to go back and do some thing else first it was in trying to avoid pitfalls such as this that i undertook a detailed examination of the processes involved what i thought each trainee had to know and what questions they would most frequently ask from this analysis i developed the various process procedures only after i had done so was i able to train effectively and with the confidence that i was doing the best possible job answers had to be at hand for all of their questions and in what ever detail they needed to know
