two ideas lie gleaming on the jeweler s velvet the first is the calculus the second the algorithm the calculus and the rich body of mathematical analysis to which it gave rise made modern science possible but it has been the algorithm that has made possible the modern world david berlinski the advent of the algorithm first there was the concept of integers then there were symbols for integers i ii iii 1111 fttt what might be called a sticks and stones representation i ii iii iv v roman numerals 1 2 3 4 5 arabic numerals etc then there were other concepts with symbols for them and algorithms sometimes for manipulating the new symbols then came collections of mathematical knowledge tables of mathematical computations theorems of general results

soon after algorithms came devices that provided assistance for carrying out computations then mathematical knowledge was organized and structured into several related concepts and symbols logic algebra analysis topology algebraic geometry number theory combinatorics etc this organization and abstraction lead to new algorithms and new fields like universal algebra but always our symbol systems reflected and influenced our thinking our concepts and our algorithms
