does human life have any significance the statements below have become widely accepted in the western world life is the accidental product of random events the laws of physics are totally deterministic science does not accept a connection between physical matter and human consciousness atheism is a conclusion from evidence while faith is speculation science and faith are incompatible suffering contradicts the existence of a loving omnipotent god jesus was a compilation of pagan mythologies or a human

teacher who was deified but do these statements represent eternal truths are they logical conclusions based on established facts or merely opinions what is the evidence to investigate these and other questions of existence and faith a skeptical academic objectively explored relevant aspects of philosophy mythology history archaeology cosmology quantum physics biochemistry and various faiths that finally led to investigation of the judeo christian scriptures including the dead sea scrolls and the gnostic gospels the findings of this research not only challenge many modern assumptions but also have significant implications for our understanding of reality written with minimum technicality for general readership this book presents a wide range of interesting and carefully confirmed facts relevant to the above questions whether you are an atheist or an agnostic a christian or a follower of another faith or have simply not been interested this investigation provides valuable and surprising insights into the nature of the universe and our place in it

in 2007 two former u s secretaries of state a defense secretary and a former senator wrote persuasively in the wall street journal that the time had come to move seriously toward a nuclear free world almost two years later the global zero movement was born with its chief aim to rid the world of such weapons once and for all by 2030 but is it realistic or even wise to envision a world without nuclear weapons more and more people seem to think so barack obama has declared america s commitment to seek the peace and security of a world without nuclear weapons but that is easier said than done michael o hanlon places his own indelible stamp on this critical issue putting forth a friendly skeptic s case for nuclear disarmament calls to ban the bomb are as old as the bomb itself but the pace and organization of nonproliferation campaigns have picked up greatly recently the growing global zero movement for example wants treaty negotiations to begin in 2019 would this be prudent or even feasible in a world that remains dangerous divided and unpredictable after all america s nuclear arsenal has been its military trump card for much of the period since world war ii pursuing a nuclear weapons ban prematurely or carelessly could alarm allies leading them to consider building their own weapons the opposite of the intended effect o hanlon clearly presents the dangers of nuclear weapons and the advantages of disarmament as a goal but even once an accord is in place he notes temporary suspension of restrictions may be necessary in response to urgent threats such as nuclear cheating or discovery of an advanced biological weapons program to take all nuclear options off the table forever strengthens the hand of those that either do not make that pledge or do not honor it for the near term traditional approaches to arms control including dismantling existing bomb inventories can pave the way to make a true nonprol

there are many ways to show our devotion to an author besides reading his or her works graves make for popular pilgrimage sites but far more popular are writers house museums what is it we hope to accomplish by trekking to the home of a dead author we may go in search of the point of inspiration eager to stand on the very spot where our favorite literary characters first came to life and find ourselves instead in the house where the author himself was conceived or where she drew her last breath perhaps it is a place through which our writer passed only briefly or maybe it really was a longtime home now thoroughly remade as a decorator's show house in a skeptic's guide to writers houses anne trubek takes a vexed often funny and always thoughtful tour of a goodly number of house museums across the nation in key west she visits the shamelessly ersatz shrine to a hard living ernest hemingway while meditating on his lost cuban farm and the sterile idaho house in which he committed suicide in hannibal missouri she walks the fuzzy line between fact and fiction as she visits the home of the young samuel clemens and the purported haunts of tom sawyer becky thatcher and injun joe she hits literary pay dirt in concord massachusetts the nineteenth century mecca that gave home to hawthorne emerson and thoreau and yet could not accommodate a surprisingly complex louisa may alcott she takes us along the trail of residences that edgar allan poe left behind in the wake of his many failures and to the burned out shell of a california house with which jack london staked his claim on posterity in dayton ohio a charismatic guide brings paul laurence dunbar to compelling life for those few visitors willing to listen in cleveland trubek finds a moving remembrance of charles chesnutt in a house that no longer stands why is it that we visit writers houses although admittedly skeptical about the stories these buildings tell us about their former inhabitants anne trubek carries us along as she falls at least a little bit in love with each stop on her itinerary and finds in each some truth about literature history and contemporary america

radical skepticism endorses the extreme claim that large swaths of our ordinary beliefs such as those produced by perception or memory are irrational the best arguments for such skepticism are in their essentials as familiar as a popular science fiction movie and yet even seasoned epistemologists continue to find them strangely seductive moreover although most contemporary philosophers dismiss radical skepticism they cannot agree on how best to respond to the challenge it presents in the tradition of the 18th century scottish philosopher thomas reid radical skepticism and epistemic intuition joins this discussion by taking up four main tasks first it identifies the strongest arguments for radical skepticism namely underdetermination arguments which emphasize the gap between our evidence and our ordinary beliefs based on that evidence second it rejects all inferential or argument based responses to radical skepticism which aim to lay out good noncircular reasoning from the evidence on which we base our ordinary beliefs to the conclusion that those beliefs are probably true third it develops a commonsense noninferential response to radical skepticism with two distinctive features a it consciously and extensively relies on epistemic intuitions which are seemings about epistemic goods such as knowledge and rationality and b it can be endorsed without difficulty by both internalists and externalists in epistemology fourth and finally it defends this commonsense epistemic intuition based response to radical skepticism against a variety of objections including those connected with underdetermination worries epistemic circularity disagreement problems experimental philosophy and concerns about whether it engages skepticism in a sufficiently serious way

you want more scepticism at the very foundation of your work scepticism the tonic of minds the tonic of life the agent of truth the way of art and salvation joseph conrad wrote these words to john galsworthy in 1901 and this study argues that conrad s skepticism forms the basis of his most important works participating in a tradition of philosophical skepticism that extends from descartes to the present conrad s epistemological and moral skepticism expressed forestalled mitigated and suppressed provides the terms for the author s rethinking of the peculiar relation between philosophy and literary

form in conrad s writing and more broadly for reconsidering what it means to call any novel philosophical among the issues freshly argued are conrad s thematics of coercion isolation and betrayal the complicated relations among author narrator and character and the logic of conradian romance comedy and tragedy the author also offers a new way of conceptualizing the shape of conrad s career especially the decline evidenced in the later fiction the uniqueness of conrad s multifarious literary and cultural inheritance makes it difficult to locate him securely in the dominant tradition of the british novel a philosophical approach to conrad however reveals links to other novelists notably hardy forster and woolf all of whom share in the increasing philosophical burden of the modern novel by enacting the very philosophical issues that are discussed within their pages conrad s interest as a skeptic is heightened by the degree to which he resists the insights proffered by his own skepticism the first chapter introduces the idea of the conradian shelter and the next two use schopenhauer to show how the language of metaphysical speculation in tales of unrest and heart of darkness spills over into a religious impulse that resists the disintegrating effect of conrad s skepticism the author then turns to hume to model the authorial skepticism that in lord jim contests the continuing visionary strain of the earlier fiction and descartes to analyze the ways in which romantic vision is more stringently chastened by irony in nostromo and the secret agent the concluding chapter touches on several late novels before examining how competing models of political agency in conrad s last great fiction of skepticism under western eyes situate it somewhere between ideology critique and a mystified account of the exigencies of individual consciousness

autobiographical accounts by nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process lives of the laureates offers readers an informal history of modern economic thought as told through autobiographical essays by twenty three nobel prize laureates in economics the essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity the accounts are accessible and engaging achieving clarity without sacrificing inherently difficult content this sixth edition adds four recent nobelists to its pages eric maskin who illustrates his explanation of mechanism design with an example involving a mother a cake and two children joseph stiglitz who recounts his field s ideological wars linked to policy disputes paul krugman who describes the insights he gained from studying the model of the capitol hill babysitting coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them and peter diamond who maps his development from student to teacher to policy analyst lives of the laureates grows out of a continuing lecture series at trinity university in san antonio which invites nobelists from american universities to describe their evolution as economists in personal as well as technical terms these lectures

demonstrate the richness and diversity of contemporary economic thought the reader will find that paths cross in unexpected ways that disparate thinkers were often influenced by the same teachers and that luck as well as hard work plays a role in the process of scientific discovery the laureates lawrence r klein kenneth j arrow paul a samuelson milton friedman george j stigler james tobin franco modigliani james m buchanan robert m solow william f sharpe douglass c north myron s scholes gary s becker robert e lucas jr james j heckman vernon l smith edward c prescott thomas c schelling edmund s phelps eric s maskin joseph e stiglitz paul krugman peter a diamond
